1. General Information

Note

I This section explains the general information in this document and will give you an overview of this document.

1.1 The Purpose of This Document

This document provides a detailed description of all user functions, which can be performed on the POS terminal. The document is intended for use by the Software Engineers developing and maintaining the Payment Application design for the US Payment Card Industry, also for use by customer and Independent Sells Organization (ISO). The document should be maintained along with the application itself.

It is required that this document is stored in a safe place for future reference and modifications.

1.2 Document Convention

Warning - Failure to follow specific procedures and practices may result in personal injury.

Caution - Failure to follow specific procedures and practices may result in damage to the POS terminal device or other equipment.

Note - Helpful hints and other important information about the use of the POS terminal device.

CHART FOR STEP # - Due to keyboard differences, actions will differ with from one POS terminal model to another. Make sure to match the action with the correct model of the POS terminal being used.

I - Denotes a definition or explanation of the User Function in the step/action table that follows.

E - Denotes an example of when, why and what condition the User Function should be performed.

W - Denotes a warning note to the User that the operation will cause serious consequent problems.

1.3 Document Structure

This Document is intended to be a Generic Users Manual for the PAX S80 Countertop Terminal. Some of the features and instructions listed in this manual may not be supported by all processors. Please contact PAX Technical Service with any questions about feature availability.

This manual contains the following sections:

- Chapter 1, General Information
- Chapter 2, PAX S80 POS Terminal Overview
- Chapter 3, How to Load an Application
- Chapter 4, How to Do a Transaction
- Chapter 5, Function Options
- Chapter 6, Menu Options
- Appendix A: Receipts
- Appendix B: Troubleshooting
- Appendix D: Glossary

1.4 Authorized Use Permission

Unless explicitly stated otherwise all content included on this document, such as but not limited to text, images, logos, and slogans, is the property of PAX and is protected by U.S. and international copyright laws.

Any other use, including the reproduction, modification, display or distribution, of the content on this system is strictly prohibited. No portion of this system may be reproduced, duplicated, copied, sold, resold, or otherwise exploited for any purpose.

2. PAX S80 POS Terminal Overview

2.1 POS Terminal Screens

The Screen representations shown in this manual are general screens. The following is an example of the idle and Main Menu screens for each of the different LCD Display types.

A standard screen and font format should accommodate 21 characters per line and up to 5 lines of text.

Screen Display

Idle Prompt Screen:

Main Menu Screen:

Function Menu Screen

2.2 POS Terminal Communication Options

The following chart summarizes the information regarding the different POS terminal model communication options.

MODEL	LAND LINE	GPRS	CDMA	ETHERNET	WI-FI
S80	√			√	

2.3 POS Terminal Keypad Layout

All POS terminals have a number of keys in common. These keys are the same and perform the same function regardless of the POS Terminal model. Other keys are unique to either one model or a series of models.

2.3.1 Key Definitions

Note

I All POS terminals have a number of keys in common. These keys are the same and perform the same function regardless of the POS Terminal model. Other keys are unique to either one model or a series of models.

KEY	FUNCTION	
ON / OFF	Powers the terminal On & Off.	
Shortcut	ATM1	Not used.
	ATM2	Not used.
	ATM3	In main screen - cycles through the different EDC types, Credit, Debit, Cash, etc
	ATM4	In main screen scroll through available transaction types: <SALE>, <RETURN>, <VOID>, <AUTH> and <FORCED>, etc
ALPHA	When entering data, changes the number to one of the letters printed on the key.	
Up/Down Arrow Keys	On main screen used to scroll through available transaction types: <SALE>, <RETURN>, <VOID>, <AUTH> and <FORCED>, etc. When in a menu, scrolls up and down through the menu choices.	
FUNC	<FUNC> key is used in key combinations, i.e. <FUNC>+<ENTER> Single <FUNC> makes the terminal enter the FUNCTION MENU.	
MENU	Access to the main application menu.	
1-0 Number Keys	Enter amounts, account numbers, dates and any numeric value. When used with the ALPHA key, accesses the alphabet characters.	
CANCEL	Used to cancel an operation or in progress transaction.	
CLEAR	Erases the information when entering an amount or an account number or PIN. Erases character under the cursor when editing parameters, header and trailer.	
ENTER	In main screen - cycles through the different EDC types, Credit, Debit Cash, etc. Accepts entered information. Executes the current function.	
FUNC+ HOT KEYS	FUNC+ CLEAR	BATCH
	FUNC+ CANCEL	CURRENT REPORT
	FUNC+ UP ARROW	REVIEW BATCH
	FUNC+ DOWN ARROW	FIND TRANSACTION
	FUNC+ ENTER	LAST RECEIPT
	FUNC+ ALPHA	Tip MENU (RESTAURANT ONLY)

2.3.2 Key Assignments

Note

Use the table below to identify the keys on your POS Terminal model.

	S80
ON/OFF	✓
FUNC	✓
# 0-9	✓
Alpha	✓
Menu	✓
Cancel	✓
Clear	✓
Enter	✓
Shortcut	✓

2.3.3 Keypad Layout

Note

Below is an example of the keypad layout of the S80 POS terminals.

3. How to Load Application

Note

I This section explains the instructions for loading the applications as well as its parameters to the terminal.
Rebuilding the file system is recommended before loading new applications.

For Details on how to load the application, please refer to [BroadPOS Users Manual](#)

4. How to Do Transactions

Note

I This section explains the steps required for processing the different types of transactions.
Note: Exact transaction types are subject to Host Specific features.

4.1 Credit Transaction

4.1.1 Credit Sale

Note

I A Credit Card Sale can be performed either by swiping or manually entering the account number and expiration date embossed on the front of the card. Bank rates should be checked before manually entering transactions.

E **Example:** X goes to Y's shop to buy a cell phone. After X finishes his shopping, he goes to Y to pay for the cell phone. X delivers his credit card to Y, and Y processes a Credit Sale transaction on the S80 POS terminal. When the transaction is complete, Y returns the credit card to X. X takes the card and cell phone, and then goes home.

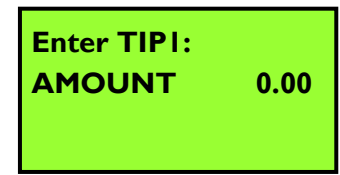

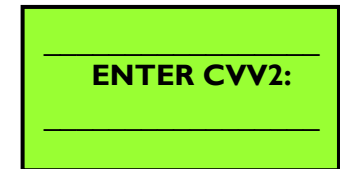

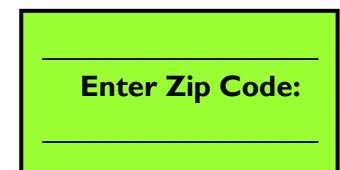

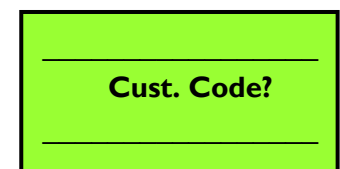

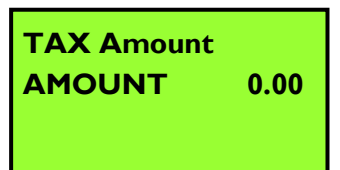

- X-Credit card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	Be sure the terminal is at the Idle Prompt	INPUT ACCOUNT CREDIT SALE
2.	Swipe the credit card, Or manually key in the account number and expiration date.	
2.1	If the security for Card Manual Entry is on, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	ENTER PASSWORD:
2.2	Manually key in the full account number then press [ENTER] . The account number must be between 13-16 digits.	CREDIT SALE 5555

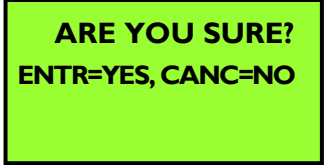

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

2.3	Enter the four-digit expiration date in MMY format then press [ENTER] .	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Exp. Date: MMYY</p> </div>

4.1.2 Credit Return

Note

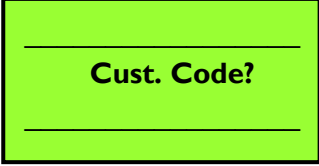

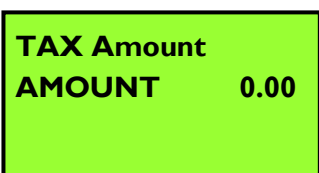

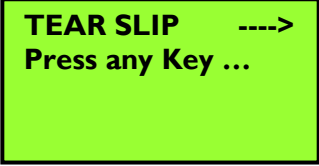

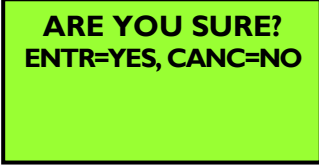

I A Credit RETURN is the reversal of an approved and settled transaction. A RETURN issues credit to the customer's credit card. If the transaction has not already been settled, a VOID should be processed.

E **Example:** X bought a cell phone from Y's shop in the previous day. But he found that cell phone does not work well. So he went to Y's shop to return the cell phone and wanted Y to return his money. Y has done a batch close so he cannot void that transaction, he should do a Credit Return to return money to X's Credit card account. X gives his credit card to Y. Y processes a Credit Return transaction. Then, X gives the cell phone back to Y and Y give the credit card to X.

- X-Credit card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [UP/DOWN] or [SHORTCUT] button until RETURN displays.	
2.	Swipe the credit card or key in the account number and expiration date manually.	
3.	Input the amount of the Return then Press [ENTER] . I * If the original transaction included a tip amount then the <u>total amount</u> should be entered as the return amount.	
4.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
5.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.	<p>This prompt occurs when the Table Mode feature is turned on.</p> <p>When prompted, enter the table number then press [ENTER].</p>	
7.	<p>This prompt occurs when the Guest No. Mode feature is turned on.</p> <p>When prompted, enter the number of guests then press [ENTER].</p>	
8.	<p>If the account number was manually entered, the terminal will ask if the card is present. Depending on the user's response the terminal will prompt for V-code and other AVS settings*.</p> <p>* Dependent upon Fraud Control settings.</p>	
9.	<p>This is a feature of Commercial Cards.</p> <p>Enter the additional information required for commercial cards then press [ENTER].</p>	
10.	<p>When prompted, enter the TAX Amount then press [ENTER].</p>	
11.	<p>Press any key for the second receipt to be printed.</p> <p>If a second receipt is not wanted, press [CANCEL].</p>	
12.	<p>Press [ENTER] for no receipt.</p> <p><u>OR</u></p> <p>Press [CANCEL] to print the second receipt.</p>	
13.	<p>Stop.</p>

4.1.3 Credit Auth

Note

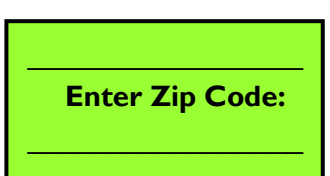

I An Auth transaction represents a pre-authorization that does NOT charge the credit card. It *reserves* the requested amount and places a hold on the customer's open-to-buy. To charge the card after an AUTH a POSTAUTH transaction must be completed.

E **Example:** X has travel to Hawaii and he needs to book a room in advance. He makes a phone call to H hotel. The hotel clerk tells X that he must authorize a certain amount of money to the hotel in advance to reserve the room. X gives his credit card information to the hotel clerk. The clerk performs a Credit Pre-Auth with the S80 POS terminal. X has booked a room in the hotel and prepares to go on his travel.

- X-Credit card holder

STEP	ACTION	DISPLAY
1.	From the Idle prompt press [UP/DOWN] or [SHORTCUT] button until AUTH displays.	
2.	Swipe the credit card or key in the account number and expiration date manually.	
3.	Input the dollar amount of the transaction then press [ENTER]	
4.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
5.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.	<p>This prompt occurs when the Table Mode feature is turned on.</p> <p>When prompted, enter the table number then press [ENTER].</p>	
7.	<p>This prompt occurs when the Guest No. Mode feature is turned on.</p> <p>When prompted, enter the number of guests then press [ENTER].</p>	
8. 	<p>If the account number was manually entered, the terminal will ask if the card is present. Depending on the user's response the terminal will prompt for V-code and other AVS settings*.</p> <p>* Dependent upon Fraud Control settings.</p>	
9.	<p>Press [1] if the card is present.</p> <p><u>OR</u></p> <p>Press [2] if the card is not present.</p>	
10.	<p>Enter the V-code from the back of the credit card then press [ENTER].</p>	
11. 	<p>Enter the street address then press [ENTER].</p> <p>i.e.: If billing address is 123 Main St., enter 123.</p>	
12. 	<p>Enter the ZIP Code then press [ENTER].</p> <p>i.e.: If billing address ZIP code is 12345-0123., enter 12345.</p>	
13.	<p>The terminal will contact the Host Processor for an approval and print one receipt.</p>	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

14.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	TEAR SLIP ----> Press any Key ...
15.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	ARE YOU SURE? ENTR=YES, CANC=NO
16.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.1.4 Credit PostAuth

Note

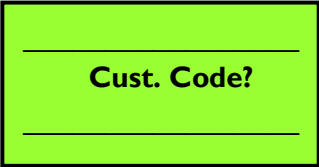

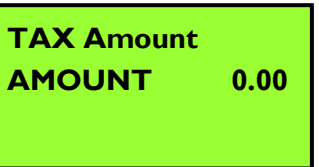

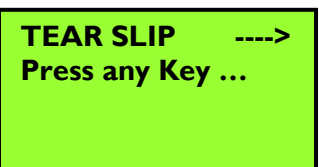

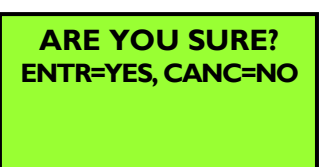

I When authorization has previously been obtained via an AUTH transaction, a PostAuth can be performed to complete the transaction and receive payment.

E **Example:** X is travelling to Hawaii and he has booked a room in a hotel in Hawaii. He arrives at the hotel where he has booked a room. X gives his personal information to clerk and gives his Credit card to clerk. The clerk does a Credit Post-Auth on the S80 POS terminal. After the transaction, the clerk gives the key to X and leads X to his room.

- X-Credit card holder

STEP	ACTION	DISPLAY
1.	From the Idle prompt use [UP/DOWN] or [SHORTCUT] button until POSTAUTH displays.	
2.	Swipe the credit card or key in the account number and expiration date manually.	
3.	Input the transaction # to be completed.	
4.	The terminal searches the database for an AUTH transaction that matches the criteria. Once found, the terminal processes the transaction. If the terminal does not find the transaction, it displays “ TRANS NOT FOUND! ” and reverts back to the main screen.	
5.	Input the dollar amount of the transaction then press [ENTER]	
6.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	<p>This prompt occurs when the Clerk/Server ID Mode feature is turned on.</p> <p>When prompted, enter the clerk/server ID then press [ENTER].</p>	
8.	<p>This prompt occurs when the Tip Option feature is turned on.</p> <p>Input the amount for tip on the Keypad then press [ENTER].</p>	
9.	<p>This prompt occurs when the Card Present Mode feature is turned on.</p> <p>Press [1] if the card is present.</p> <p><u>OR</u></p> <p>Press [2] if the card is not present.</p>	
10.	<p>This is a feature of Commercial Cards.</p> <p>Enter the additional information required for commercial cards then press [ENTER].</p>	
11.	<p>When prompted, enter the TAX Amount then press [ENTER].</p>	
12.	<p>Press any key for the second receipt to be printed.</p> <p>If a second receipt is not wanted, press [CANCEL].</p>	
13.	<p>Press [ENTER] for no receipt.</p> <p><u>OR</u></p> <p>Press [CANCEL] to print the second receipt.</p>	
14.	<p>Stop.</p>	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.1.5 Credit Forced

Note

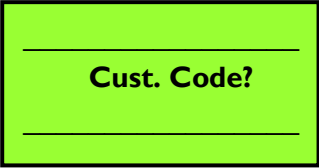

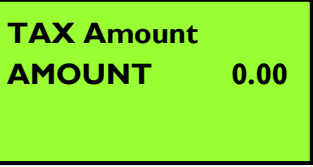

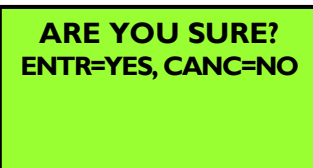

I When authorization has previously been obtained via an AUTH transaction or via Voice Authorization, a Forced Sale must be performed to complete the transaction and receive payment.

E **Example:** X will have a travel to Hawaii and he needs to book room in advance. He has done a Voice Authorization and gotten an auth code. When he arrives at the hotel, he gives the card and auth code to clerk. The clerk does a Credit Forced transaction. After the transaction, the clerk gives the key to X and leads X to his room.

- X-Credit card holder

STEP	ACTION	DISPLAY
1.	From the Idle prompt use [UP/DOWN] or [SHORTCUT] button until FORCED displays.	
2.	Swipe the credit card or key in the account number and expiration date manually.	
3.	Input the dollar amount of the transaction then press [ENTER]	
4.	Input the authorization number previously obtained then press [ENTER] .	
5.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
6.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	<p>This prompt occurs when the Tip Option feature is turned on.</p> <p>Input the amount for tip on the Keypad then press [ENTER].</p>	
8.	<p>This prompt occurs when the Card Present Mode feature is turned on.</p> <p>Press [1] if the card is present.</p> <p><u>OR</u></p> <p>Press [2] if the card is not present.</p>	
9.	<p>This is a feature of Commercial Cards.</p> <p>Enter the additional information required for commercial cards then press [ENTER].</p>	
10.	<p>When prompted, enter the TAX Amount then press [ENTER].</p>	
11.	<p>Depending upon the Processor, the terminal may or may not contact the Credit Host. The first receipt will be printed.</p>	
12.	<p>Press any key for the second receipt to be printed.</p> <p>If a second receipt is not wanted, press [CANCEL].</p>	
13.	<p>Press [ENTER] for no receipt.</p> <p><u>OR</u></p> <p>Press [CANCEL] to print the second receipt.</p>	
14.	<p>Stop.</p>	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

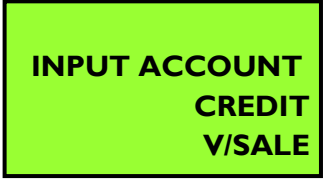

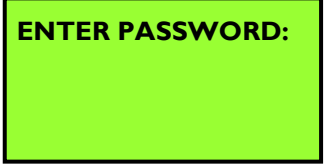

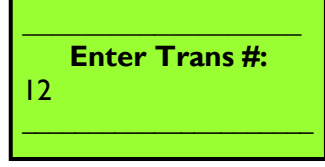

4.1.6 Credit Void Sale

Note

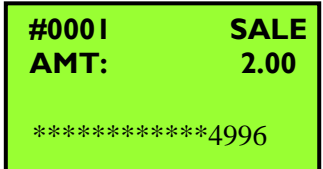

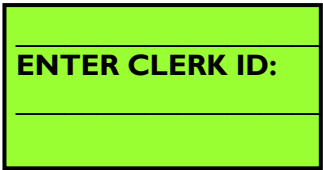

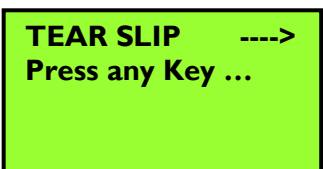

I To void a sale is to nullify an approved transaction, one that has already been authorized but not settled. If the transaction has already been settled, a RETURN must be processed. A VOID does not remove the hold on the customer's open-to-buy.

E **Example:** X bought a cell phone from Y's shop in the morning. But he found that cell phone does not work. So he went to Y's shop to return the cell phone and wanted Y to return his money. The Clerk should do a Credit Void Sale to void the previous transaction. Y process a Credit Void Sale transaction. Then, X gives the cell phone back to Y and Y gives the credit card to X.

- X-Credit card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [UP/DOWN] or [SHORTCUT] button until V/SALE displays.	
1.1	If Void Sale is password protected, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
2.	Swipe the credit card or key in the account number and expiration date manually.	
2.1	If the security for Card Manually Entry is on, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
3.	Input the transaction # to be voided.	
4.	The terminal searches the database for a Sale transaction that matches the criteria. Once found, the terminal processes the transaction. If the terminal does not find the transaction, it displays "TRANS NOT FOUND!" and reverts back to the main screen.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

5.	View the transaction on the display to verify it is the correct transaction then Press [ENTER]	
6.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	
7.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	
8.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

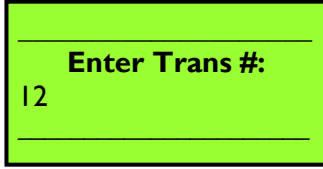

4.1.7 Credit Void Return

Note

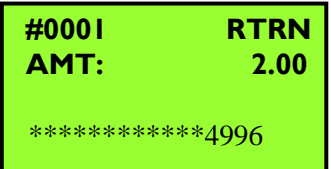

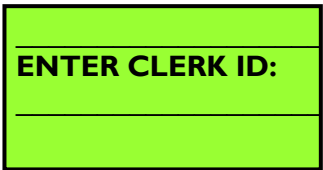

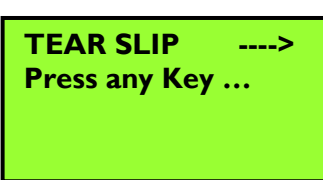

I A RETURN transaction processed in error can be VOIDED if the RETURN has not been batched out. This will nullify the RETURN previously done in the same batch.

E **Example:** X bought a cell phone from Y's shop in the previous day. But he found that cell phone does not work well. So he went to Y's shop to return the cell phone and wanted Y to return his money. He should do a Credit Return to return money to X's Credit card account. X gives his credit card to Y. Y processes a Credit Return transaction. But X changes his mind and decides that he wants the cell phone. So X gives his card to Y and Y does a Credit Void Return on the S80 POS terminal. Y returns the credit card to X. X takes the card and cell phone, and goes home.

- X-Credit card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [UP/DOWN] or [SHORTCUT] button until V/RTRN displays.	
1.1	If Void Return is password protected, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
2.	Swipe the credit card or key in the account number and expiration date manually.	
2.1	If the security for Card Manually Entry is on, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
3.	Input the transaction # to be voided.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.	The terminal searches the database for a Return transaction that matches the criteria. Once found, the terminal processes the transaction. If the terminal does not find the transaction, it displays “ TRANS NOT FOUND! ” and reverts back to the main screen.	
5.	View the transaction on the display to verify it is the correct transaction then Press [ENTER]	
6.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	
7.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	
8.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.1.8 Credit Void Post-Auth

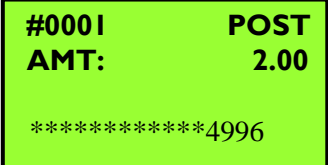

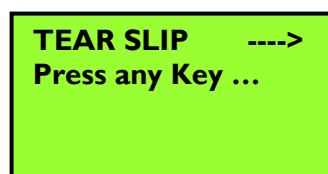

Note

I A Post-Auth sale can be VOIDED if the transaction is in the current open batch. A VOID/POST-AUTH does remove any hold on the customer's open-to-buy.

E **Example:** X planned to go to Hawaii to and he had booked a room at a hotel through Credit Auth. After arriving in Hawaii he goes to the Hotel and the checks in. The Clerk runs a POST-AUTH transaction and Checks X into the Hotel. As X is heading to his room, a call comes and he has to go back to US. X goes back to the front desk and informs the Clerk that he has to check out and he would like his money back. The clerk does a Credit Void Post-Auth transaction to return the money to X's credit account. Then X goes back to US.

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [UP/DOWN] or [SHORTCUT] button until V/FRCD displays.	
1.1	If Void Forced is password protected, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
2.	Swipe the credit card or key in the account number and expiration date manually.	
2.1	If the security for Card Manually Entry is on, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
3.	Input the transaction # to be voided.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.	<p>The terminal searches the database for a Forced transaction that matches the criteria. Once found, the terminal processes the transaction.</p> <p>If the terminal does not find the transaction, it displays “TRANS NOT FOUND!” and reverts back to the main screen.</p>	
5.	<p>View the transaction on the display to verify it is the correct transaction then</p> <p>Press [ENTER]</p>	
6.	<p>This prompt only occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER].</p>	
7.	<p>Press any key for the second receipt to be printed.</p> <p>If a second receipt is not wanted, press [CANCEL].</p>	
8.	<p>Press [ENTER] for no receipt.</p> <p><u>OR</u></p> <p>Press [CANCEL] to print the second receipt.</p>	
9.	<p>Stop.</p>

4.1.9 Credit Void Forced

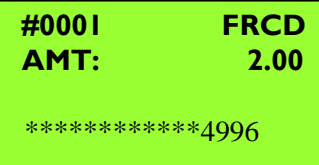

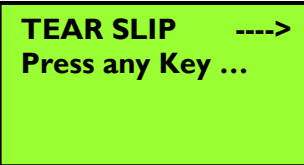

Note

I A FORCED sale can be VOIDED if the transaction is in the current open batch. A VOID/FORCED does remove any hold on the customer's open-to-buy.

E **Example:** X planned to go to Hawaii to and he had booked a room at a hotel through Voice Auth. After arriving in Hawaii he goes to the Hotel and the checks in. The Clerk runs a Credit Forced transaction and Checks X into the Hotel. As X is heading to his room, a call comes and he has to go back to US. X goes back to the front desk and informs the Clerk that he has to check out and he would like his money back. The clerk does a Credit Void Forced transaction to return the money to X's credit account. Then X goes back to US.

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [UP/DOWN] or [SHORTCUT] button until V/FRCD displays.	
1.1	If Void Forced is password protected, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
2.	Swipe the credit card or key in the account number and expiration date manually.	
2.1	If the security for Card Manually Entry is on, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
3.	Input the transaction # to be voided.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.	The terminal searches the database for a Forced transaction that matches the criteria. Once found, the terminal processes the transaction. If the terminal does not find the transaction, it displays “ TRANS NOT FOUND! ” and reverts back to the main screen.	
5.	View the transaction on the display to verify it is the correct transaction then Press [ENTER]	
6.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	
7.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	
8.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.2 Debit Transaction

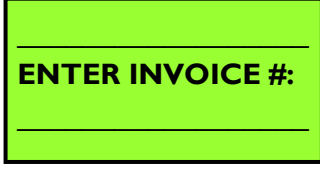

4.2.1 Debit Sale

Note

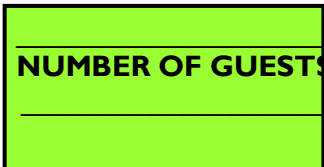

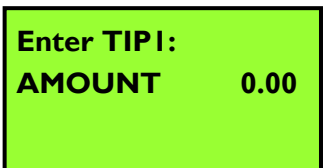

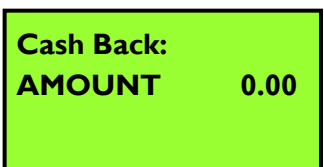

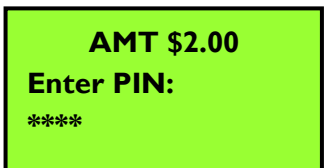

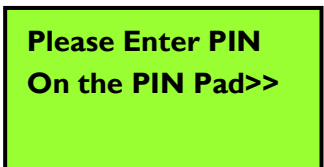

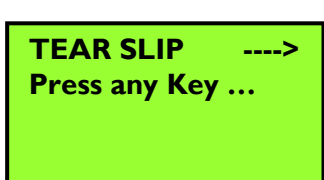

I A Debit Card Sale must be completed by swiping the customer's debit card through the card reader. Manually entered debit transactions are not allowed.

E **Example:** X goes to Y's shop to buy a cell phone. After X finishes his shopping, he goes to Y to pay for the cell phone. X delivers his debit card to Y, and Y processes a Debit Sale transaction on the S80 POS terminal. When the transaction is complete, Y returns the debit card to X. X takes the card and cell phone, and goes home.

- X-Debit card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the idle prompt press the [SHORTCUT] button to scroll through the list of available EDC types to select the DEBIT prompt.	
2.	Swipe the debit card. (Debit cards cannot be keyed in manually, they MUST be swiped)	
3.	Input the dollar amount of the transaction then press [ENTER] .	
4.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
5.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.	<p>This prompt occurs when the Table Mode feature is turned on.</p> <p>When prompted, enter the table number then press [ENTER].</p>	
7.	<p>This prompt occurs when the Guest No. Mode feature is turned on.</p> <p>When prompted, enter the number of guests then press [ENTER].</p>	
8.	<p>This prompt occurs when the Tip Option feature is turned on.</p> <p>Input the amount for tip on the Keypad then press [ENTER].</p>	
9.	<p>This prompt occurs when the CashBack Prompt is turned on.</p> <p>Input the amount for cash back on the Keypad then press [ENTER].</p>	
10.	<p>Input the PIN on the Keypad then press [ENTER].</p>	
11.	<p>If using an external PIN pad the PIN Entry prompt will be displayed on the PIN pad instead of the terminal.</p> 	
12.	<p>The terminal contacts the Host Processor for an approval and prints one receipt.</p>	
13.	<p>Press any key for the second receipt to be printed.</p> <p>If a second receipt is not wanted, press [CANCEL].</p>	
14.	<p>Press [ENTER] for no receipt.</p> <p><u>OR</u></p> <p>Press [CANCEL] to print the second receipt.</p>	
15.	<p>Stop</p>	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.2.2 Debit Return

Note

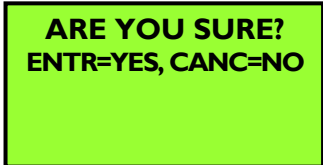

I A debit transaction cannot be voided but it can be returned. Just like a Debit Sale, the card must be swiped to perform a Debit RETURN.

E **Example:** X bought a cell phone from Y's shop in the previous day. But he found that cell phone does not work well. So he went to Y's shop to return the cell phone and wanted Y to return his money. Y should do a Debit Return to return money to X's debit card account. X hands his debit card to Y. Y processes a Debit Return transaction. Then, X gives the cell phone back to Y and Y gives the debit card to X.

- X-Debit card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [SHORTCUT] button until DEBIT is displayed, then press [UP/DOWN] or [SHORTCUT] button until RETURN is displayed.	
2.	Swipe the debit card.	
3.	Input the amount of the Return then press [ENTER] I * If the original transaction includes a tip amount then the total amount should be entered as the return amount.	
4.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
5.	This prompt occurs when the Clerk/Server ID Mode is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	
6.	This prompt occurs when the Table Mode feature is turned on. When prompted, enter the table number then press [ENTER] .	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	<p>This prompt occurs when the <u>Guest No. Mode</u> feature is turned on.</p> <p>When prompted, enter the number of guests then press [ENTER].</p>	
8.	<p>Input the PIN on the Keypad then press [ENTER].</p>	
9.	<p>The terminal contacts the Host Processor for an approval and prints one receipt.</p>	
10.	<p>Press any key for the second receipt to be printed.</p> <p>If a second receipt is not wanted, press [CANCEL].</p>	
11.	<p>Press [ENTER] for no receipt.</p> <p><u>OR</u></p> <p>Press [CANCEL] to print the second receipt.</p>	
12.	<p>Stop.</p>

4.3 EBT Transaction

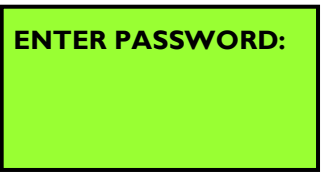

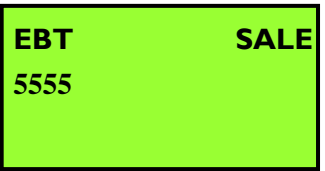

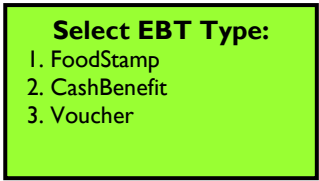

4.3.1 EBT Sale

Note

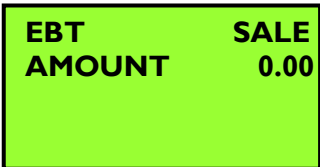

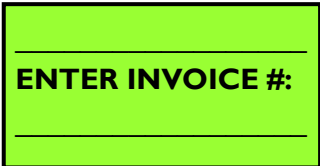

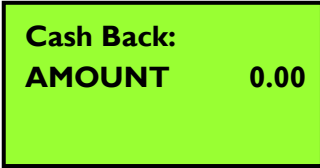

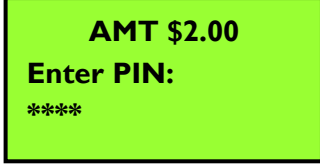

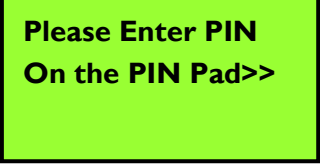

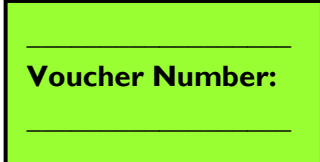

I EBT or Electronic Benefits Transfer is an electronic system that authorizes the issuer to use their government provided benefits to purchase food items or make use of the Cash Benefits feature. EBT transactions can be swiped or manually entered.

E **Example:** X goes to Y's shop to buy a cell phone. After X finishes his shopping, he goes to Y to pay for the cell phone. X delivers his EBT card to Y, and Y processes an EBT Sale transaction on the S80 POS terminal. When the transaction is complete, Y returns the EBT card to X. X takes the card and cell phone, and goes home.

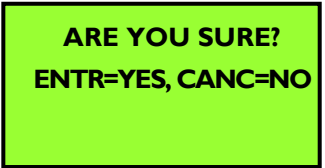

- X-EBT card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the idle prompt press the [SHORTCUT] button to scroll through the list of available EDC types to select the EBT prompt.	
2.	Swipe the EBT card, or manually enter the account number.	
2.1	If the security for Card Manual Entry is on, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
2.2	Manually keying the full account number then press [ENTER] . The account number must be between 8-19 digits.	
3.	Press [1] for Food Stamp <u>OR</u> Press [2] for Cash Benefit <u>OR</u> Press [3] for Voucher (Manual Entry only)	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.	Input the dollar amount of the transaction then press [ENTER] .

4.3.2 EBT Return

Note

I An EBT RETURN is the reversal of an approved and settled transaction. A RETURN refunds back to the customer's EBT card, if the transaction has not already been settled. EBT return is only for Food Stamps.

E **Example:** X bought some apples from Y's shop. But he found that apples are not good. So he went to Y's shop to return the apples and wanted Y to return his money. Y should do an EBT Return to return money to X's EBT card account. X hands his EBT card to Y. Y processes an EBT Return transaction. Then, X gives the apples back to Y and Y gives the EBT card to X.

- X-EBT card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [SHORTCUT] button until EBT is displayed, then press [UP/DOWN] or [SHORTCUT] button until RETURN is displayed.	
2.	Swipe the EBT card.	
3.	Input the amount of the Return then press [ENTER] I * If the original transaction includes a tip amount then the total amount should be entered as the return amount.	
4.	This prompt occurs when Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
5.	This prompt occurs when Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .

4.3.3 EBT Balance Inquiry

Note

I Balance Inquiry transaction is used for inquiring about the available balance of an EBT account.

E **Example:** X wants to check the amount of funds available on his EBT card. So he goes to Y's shop to ask Y to do an EBT Balance Inquiry. Y takes the EBT card and does an EBT Balance Inquiry on an S80 POS terminal. X gets the receipt and knows the available balance of his EBT card

- X-EBT card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [SHORTCUT] button until EBT is displayed, then press [UP/DOWN] or [SHORTCUT] button until BALANCE displays.	
2.	Swipe the EBT card or key in the account number manually.	
3.	Press [1] for Food Stamp <u>OR</u> Press [2] for Cash Benefit	
4.	This prompt occurs when the Clerk/Server ID Mode is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	
5.	Input the PIN on the Keypad then press [ENTER] .	
6.	The terminal will contact the Host Processor for a balance inquiry and print one receipt.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	TEAR SLIP ----> Press any Key ...
8.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	ARE YOU SURE? ENTR=YES, CANC=NO
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.4 Gift Transaction

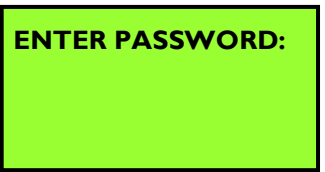

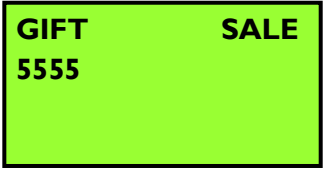

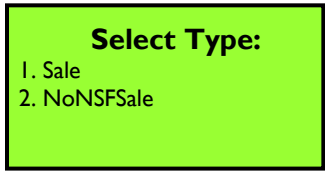

4.4.1 Gift Sale

Note

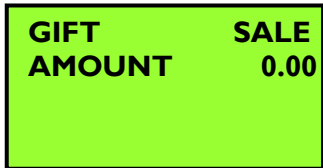

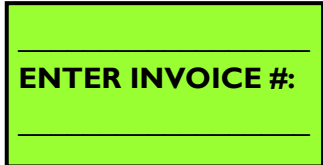

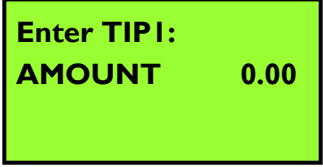

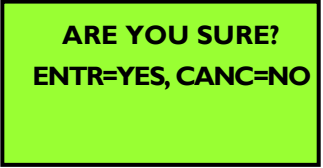

I Gift Cards are cards that are sponsored by individual Merchants. They allow the customer to purchase items or services using the card as payment.

E **Example:** X received a gift card for Y's shop. X goes to Y's shop to buy some apples. After X finishes his shopping, he goes to Y to pay for the apples. X gives his gift card to Y, and Y processes a Gift Sale transaction on the S80 POS terminal. When the transaction is complete, Y returns the gift card to X. X takes the card and apples and goes home.

- X-Gift card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the idle prompt press the [SHORTCUT] button to scroll through the list of available EDC types to select the GIFT prompt.	
2.	Swipe the GIFT card, or manually enter the account number, if required, enter the security code.	
2.1	If the security for Card Manual Entry is on, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
2.2	Manually keying the full account number then press [ENTER] . The account number must be between 13-16 digits.	
3.	Select Type. Press [1] for Sale. <u>OR</u> Press [2] for NoNSFSale.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.	Input the dollar amount of the transaction then press [ENTER] .	
5.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, input the invoice number on the Keypad then press [ENTER] .	
6.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, input the Clerk/Server ID on the Keypad then press [ENTER] .	
7.	This prompt occurs when the Tip Option feature is turned on. Input the amount for tip on the Keypad then press [ENTER] .	
8.	The terminal contacts the Host Processor for an approval and prints one receipt.	
9.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	
10.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	
11.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.4.2 Gift Return

Note

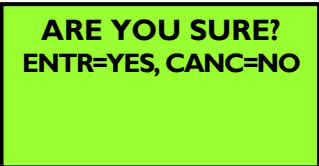

I A Gift RETURN is the reversal of an approved and settled Gift Card transaction.

E **Example:** X received a gift card for Y's shop. Yesterday X bought some apples from Y's shop with his gift card. But he found that the apples are not so good. So he went to Y's shop to return the apples and wanted Y to return his money. Y should do a Gift Return to return money to X's gift card account. X hands his gift card to Y, and Y processes a Gift Return transaction. X gives the apples back to Y and Y gives the gift card to X.

- X-Gift card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [SHORTCUT] button until DEBIT is displayed, then press [UP/DOWN] or [SHORTCUT] button until RETURN is displayed.	
2.	Swipe the gift card or key in the account number manually.	
3.	Input the amount of the Return then press [ENTER] I * If the original transaction includes a tip amount then the total amount should be entered as the return amount.	
4.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
5.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.	The terminal contacts the Host Processor for an approval and prints one receipt.	
7.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	 <p>TEAR SLIP ----> Press any Key ...</p>
8.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	 <p>ARE YOU SURE? ENTR=YES, CANC=NO</p>
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.4.3 Gift Add Value

Note

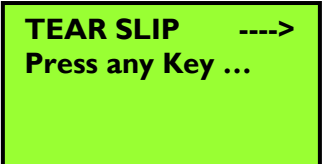

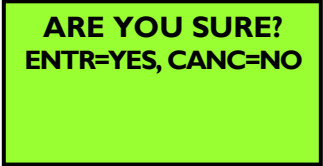

I Use the Add Value function to add credit to the available balance of an active Gift Card.

E **Example:** X received a gift card for Y's shop. X finds that his gift card balance is low so he wants to add more money to the card. So he goes to Y's shop and asks Y to add value to his gift card. X gives money and the gift card to Y. Y takes the gift card and does Gift Add Value on S80 POS terminal.

- X-Gift card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [SHORTCUT] button until GIFT is displayed, then press [UP/DOWN] or [SHORTCUT] button until ADD is displayed.	
2.	Swipe the gift card or key in the account number manually.	
3.	Input the dollar amount of the transaction then press [ENTER]	
4.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
5.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	
6.	The terminal will contact the Host Processor for an approval and print one receipt.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	 <p>TEAR SLIP ----> Press any Key ...</p>
8.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	 <p>ARE YOU SURE? ENTR=YES, CANC=NO</p>
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.4.5 Gift Void

Note

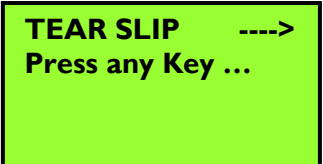

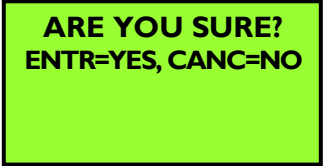

I To do a Gift Void is to nullify an approved Gift transaction, including Gift Sale, Gift Return, Gift Add Value and Gift Issue.

E **Example:** X has made a Gift Sale, or a Gift Return, or a Gift Add Value or a Gift Issue transaction, but he wants to void it. So Y does a Gift Void Transaction for X on the S80 POS terminal.

- X-Gift card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the Idle prompt use the [SHORTCUT] button until GIFT is displayed, then press [UP/DOWN] or [SHORTCUT] button until DEACT is displayed.	
2.	Swipe the gift card or key in the account number manually.	
3.	Input the transaction # to be voided.	
4.	The terminal searches the database for a Sale transaction that matches the criteria. Once found, the terminal processes the transaction. If the terminal does not find the transaction, it displays "TRANS NOT FOUND!" and reverts back to the main screen.	
5.	View the transaction on the display to verify it is the correct transaction then Press [ENTER] .	
6.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.5 Cash Transaction

4.5.1 Cash Sale

Note

I Your POS Terminal supports the ability to record cash sales for record keeping purposes. To do so, the Cash EDC mode must be enabled. Cash transactions are for record keeping purposes only. No Host Processor is involved. Cash Transactions will be totaled and listed on the Batch Report.

E **Example:** X goes to Y's shop to buy a cell phone. After X finishes his shopping, he goes to Y to pay for the cell phone in cash. X delivers his cash to Y, and Y processes a Cash Sale transaction on the S80 POS terminal. X takes the cell phone and goes home.

- X-Cash holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the idle prompt press the [SHORTCUT] button to scroll through the list of available EDC types to select the CASH prompt is displayed.	INPUT AMOUNT CASH SALE
2.	Input the dollar amount of the transaction then press [ENTER] .	CASH SALE AMOUNT 0.00
3.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	ENTER INVOICE #:
4.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	ENTER CLERK ID:
5.	This prompt occurs when the Tip Option feature is turned on. Input the amount for tip on the Keypad then press [ENTER] .	Enter TIP! AMOUNT 0.00

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.	Receipt will print.	
7.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>TEAR SLIP ----> Press any Key ...</p> </div>
8.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ARE YOU SURE? ENTR=YES, CANC=NO</p> </div>
9.	Stop.

4.5.2 Cash Return

Note

I Your POS Terminal supports the ability to record cash return for record keeping purposes. To do so, the Cash EDC mode must be enabled. Cash transactions are for record keeping purposes only. No Host Processor is involved. Cash Transactions will be totaled and listed on the Batch Report.

E **Example:** X bought some apples from Y's shop. But he found that apples are not good. So he went to Y's shop to return the apples and wants Y to return his money. Y process a Cash Return transaction. Then, X gives the apples back to Y and Y gives the money back to X.

- X-Cash; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the idle prompt press the [SHORTCUT] button to scroll through the list of available EDC types to select the CASH prompt is displayed.	
2.	Input the dollar amount of the transaction then press [ENTER] .	
3.	This prompt occurs when the Invoice Mode feature is turned on. When prompted, enter the invoice No. then press [ENTER] .	
4.	This prompt occurs when the Clerk/Server ID Mode feature is turned on. When prompted, enter the clerk/server ID then press [ENTER] .	
5.	This prompt occurs when the Tip Option feature is turned on. Input the amount for tip on the Keypad then press [ENTER] .	
6.	Receipt will print.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL] .	TEAR SLIP ----> Press any Key ...
8.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	ARE YOU SURE? ENTR=YES, CANC=NO
9.	Stop.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

4.5.3 Cash Void Sale

Note

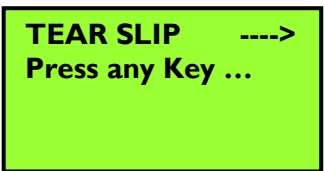

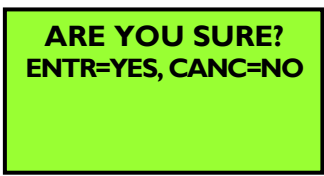

I To void a sale is to nullify an approved transaction, one that has already been authorized but not settled. However, if the transaction has already been settled, a RETURN must be processed.

E **Example:** X bought a cell phone from Y's shop in the morning. But he found that cell phone does not work well. So he went to Y's shop to return the cell phone and wanted Y to return his money. The Clerk should do a Cash Void Sale to void the previous transaction. Y process a Cash Void Sale transaction. Then, X gives the cell phone back to Y and Y give the cash back to X.

- X-Cash holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the idle prompt press the [SHORTCUT] button to scroll through the list of available EDC types to select the CASH prompt. Use the [UP/DOWN] or [SHORTCUT] button until V/SALE displays.	
1.1	If Void Sale is password protected, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
2.	Input the transaction # to be voided.	
3.	The terminal searches the database for a Sale transaction that matches the criteria. Once found, the terminal processes the transaction. If the terminal does not find the transaction, it displays "TRANS NOT FOUND!" and backs to main screen.	
4.	View the transaction on the display to verify it is the correct transaction then Press [ENTER]	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

5.	<p>This prompt occurs when the <u>Clerk/Server ID Mode</u> feature is turned on.</p> <p>When prompted, enter the clerk/server ID then press [ENTER].</p>

4.5.4 Cash Void Return

Note

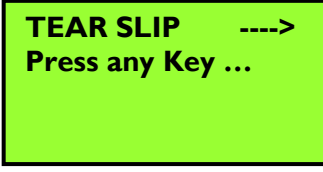

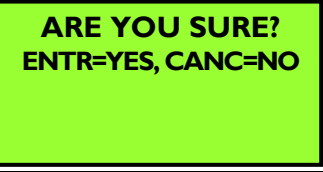

I A RETURN transaction processed in error can be VOIDED if the RETURN has not been batched out. This will nullify the RETURN previously done in the same batch.

E **Example:** X bought a cell phone from Y's shop in the previous day. But he found that cell phone does not work well. So he went to Y's shop to return the cell phone and wanted Y to return his money. He should do a Cash Return to return money to X. Y process a Cash Return transaction. But X changes his mind and decided that he wants the cell phone. So X gives his cash to Y and Y does a Cash Void Return on S80 POS terminal. X takes cell phone and goes home.

- X-Credit card holder; Y-Merchant of shop

STEP	ACTION	DISPLAY
1.	From the idle prompt press the [SHORTCUT] button to scroll through the list of available EDC types to select the CASH prompt. Use the [UP/DOWN] or [SHORTCUT] button until V/RTRN displays.	
1.1	If Void Return is password protected, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	
2.	Input the transaction # to be voided.	
3.	The terminal searches the database for a Return transaction that matches the criteria. Once found, the terminal processes the transaction. If the terminal does not find the transaction, it displays "TRANS NOT FOUND!" and backs to main screen.	
4.	View the transaction on the display to verify it is the correct transaction then Press [ENTER]

4.6 Commercial Cards

Note

i Depending upon the Credit Host processor and preloaded BIN range table, Commercial credit cards will prompt for additional information when processing.

STEP	ACTION	DISPLAY
1.	Be sure the terminal is at the Idle Prompt	INPUT CCOUNT CREDIT SALE
2.	Swipe the credit card, Or manually key in the account number and expiration date.	
3.	Input the dollar amount of the transaction then [ENTER]	CREDIT SALE AMOUNT 0.00
4.	If the account number was manually entered, the terminal will ask if the card is present. Depending on the user's response the terminal will prompt for V-code and other AVS settings. Enter the information for all AVS and V-Code prompts.	
5.	Enter the Customer Code then press [ENTER] . <u>OR</u> Press [ENTER] to bypass.	Cust. Code ?
6.	Enter the Tax Amount then press [ENTER] . <u>OR</u> Press [ENTER] to bypass. Continue to next step if tax amount was entered or skip to Step #9 if tax amount was bypassed.	TAX AMOUNT: AMOUNT 0.00

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	If the entered tax amount exceeds the user input amount the terminal will display the warning.	
8.	Enter the correct tax amount then press [ENTER]. OR Press [CANCEL] to cancel transaction OR Press [ENTER] to bypass.	
9.	The terminal contacts the Host Processor for an approval and prints one receipt.	
10.	Press any key for the second receipt to be printed. If a second receipt is not wanted, press [CANCEL].	
11.	Press [ENTER] for no receipt. <u>OR</u> Press [CANCEL] to print the second receipt.	
12.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

5. Function Option

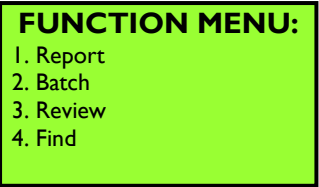

Note

- I** Your POS Terminal function key allows you to access commonly used functions quickly. You can also access your terminal's menu by pressing the **[FUNC]** button.

5.1 Report

Note

- I** The terminal will print the Default Report. For instructions on how to set the Default Report please refer to [6.3 Reports](#)

STEP	ACTION	DISPLAY
1.	From the idle prompt press [FUNC] to access via the Function Menu.	
2.	Use the [▲] & [▼] keys to scroll through the options then press [ENTER] to select. <i>OR</i> Press [2] to print the default report.	
3.	Input the Password and press [ENTER] .	
4.	Terminal will print the Default Report.	
5.	Stop.	
6.		

5.2 Batch

5.2.1 Batch Close

Note

I The transactions in the terminal need to be closed or settled at the end of the business day, we call this settlement the BATCH PROCESS. Payment for the day's transactions will not be received unless the batch process is completed. A manual batch process must be performed unless the terminal capture type is Autobatch.

STEP	ACTION	DISPLAY
1.	From the idle prompt press [FUNC] then [CLEAR] to access, or press [FUNC] to access via the Function Menu.	INPUT ACCOUNT CREDIT SALE
2.	Press [3] to batch to host.	FUNCTION MENU 1. Report 2. Batch 3. Review 4. Find
3.	Select Host. It is possible to have more than one Host choice, both should be Batched one after the other.	SELECT HOST: 1. HOST1 2. HOST2
4.	Press [1] to close the batch. Note: The selections in the Batch Menu will vary with the Host Processor. With some, there are a number of different choices but others start the batch process immediately.	Batch Menu: 1. Batch Close 2. Force Batch
5.	The terminal will contact the host processor and print a batch report.	
6.	Stop.	

Note

I If a terminal is programmed for auto batch, the host will close the batch automatically each night at a specific time. The terminal will print a batch report. However, the database will only clear at the time of the first attempted sale in the new batch. If your terminal is programmed for auto batch, you may still have the option to batch manually. When Applicable, signature and check images will upload before batching.

5.3 Review

Note

I By this function, the user can review all of the transactions recorded on the POS terminal. Transactions are separated by EDC type or the user can view the total amounts (not including loyalty).

STEP	ACTION	DISPLAY
1.	From the idle prompt press [FUNC] to access via the Function Menu.	INPUT ACCOUNT CREDIT SALE
2.	Use the [▲] & [▼] keys to scroll through the options then press [ENTER] to select. <u>OR</u> Press [4] to print the default report.	FUNCTION MENU: 1. Report 2. Batch 3. Review 4. Find
3.	Input the Password and press [ENTER] .	ENTER PASSWORD:
4.	Scroll through the EDC Type options then press [ENTER] to select. <u>OR</u> Press the number corresponding with your selection.	Scroll Totals <> 1. CREDIT 1000.00 2. DEBIT 100.00 3. EBT 100.00 4. GIFT 100.00
5.	View details of transactions. Use the [▲] & [▼] keys to scroll different transaction	#0001 SALE AMT: 1000.00 TIP: 10.00 *****5454
6.	Press [CANCEL] to go back	
7.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.5 Find

Note

I By this function, the user can try to find transactions recorded on the POS terminal for current batch only. Transactions can be traced by Last 4 Digits of card.

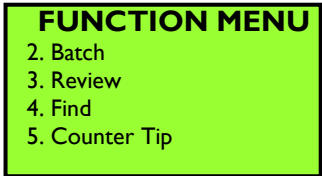

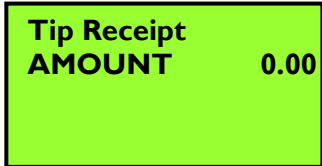

STEP	ACTION	DISPLAY
1.	From the idle prompt press [FUNC] to access via the Function Menu.	INPUT ACCOUNT CREDIT SALE
2.	Use the [▲] & [▼] keys to scroll through the options then press [ENTER] to select. <u>OR</u> Press [5] to print the default report.	FUNCTION MENU: 1. Report 2. Batch 3. Review 4. Find
3.	Input the Password and press [ENTER] .	ENTER PASSWORD:
4.	Input Last 4 Digits of the card the user wants to trace	Last 4 Digits
5.	View details of transactions. Use the [▲] & [▼] keys to scroll different transaction	#0001 SALE AMT: 1000.00 TIP: 10.00 *****5454
6.	Press [CANCEL] to go back.	
7.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.6 Counter Tip

Note

I Counter Tip can be used in either a Retail or Restaurant location. When the tip is to be entered at the time of the transaction, a Counter Tip receipt can be printed and given to the customer for them to enter the desired tip amount. The customer would enter the tip amount on the receipt and return the receipt along with their card to the cashier for processing. The Counter Tip function can be access via a Hot Key (must be programmed in the POS Terminal Management System before the terminal file is downloaded) or via the Function Menu.

STEP	ACTION	DISPLAY
1.	From the idle prompt press [FUNC] then [6] to access Counter Tip via the Function Menu.	
2.	Enter the base amount of the transaction then press [ENTER] .	
3.	The Tip Receipt will print. Give this receipt to the customer to write the tip amount. The customer should give the receipt back to the cashier along with their credit/debit card.	
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

8.	This prompt occurs when the Edit Confirm Option has been turned on. Press [ENTER] to accept the tip amount <u>OR</u> Press [CANCEL] to cancel transaction.	 <p>TIP 1:0.20 ENTR=YES, CANC=NO</p>
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.8 Reprint

Note

I This function allows you to print a Customer copy or a Merchant copy of the receipt for the last processed transaction or for any transaction.

E **Example:** The terminal ran out of paper as the Customer's receipt was printing. Replace the paper and print a copy of the Customer's receipt using the Receipt Copy function.

STEP	ACTION	DISPLAY
1.	From the idle prompt press [FUNC] then [7] to access Tip/Tab Menu via the Function Menu.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>FUNCTION MENU</p> <ul style="list-style-type: none"> 3. Review 4. Find 5. Counter Tip 7. Reprint </div>
2.	Press [1] to print a copy of the Last Customer Receipt. <u>OR</u> Press [2] , choose the EDC type then enter the transaction number to print a copy of Any Receipt. If No last Receipt option is available, then the "Any Receipt" option is selected automatically.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>RECEIPT COPY:</p> <ul style="list-style-type: none"> 1. Last Cust. Rcpt 2. Any Receipt </div>
3.	If Any Receipt was selected . . . Select the EDC Type.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>SELECT PMT TYPE:</p> <ul style="list-style-type: none"> 1. CREDIT 2. DEBIT 3. EBT 4. GIFT </div>
4.	Enter the transaction number then press [ENTER] .	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Enter Trans #:</p> <p style="text-align: center;">12</p> </div>
5.	Choose Copy Type. Press [1] for Customer. <u>OR</u> Press [2] for Merchant.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Choose Copy Type</p> <ul style="list-style-type: none"> 1. Customer 2. Merchant </div>

Receipt Copy, Continued

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without PAX prior written permission.

STEP	ACTION	DISPLAY
6.	If the terminal does not find the transaction, it displays “ TRANS NOT FOUND! ” and returns to Step 2.	
7.	The requested receipt will print.	
8.	Stop.	

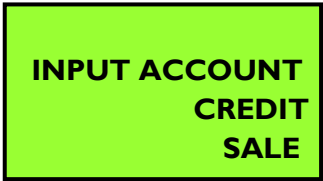

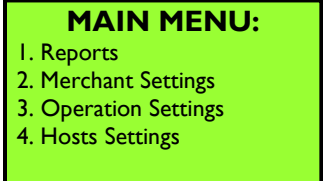

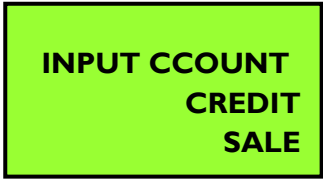

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7. Menu Option

Note

I Your POS Terminal menu options allow you to control some terminal settings without the inconvenience of reprogramming. You can choose the options that work best for your business. The menus are divided into main menu options, which have submenu options. You can access your terminal's menu by pressing the **[MENU]** button.

6.1 Accessing the Main Menu

STEP	ACTION	DISPLAY
1.	From the Idle Prompt press [MENU] .	
2.	Use the [▲] & [▼] keys to scroll through the options then press [ENTER] to select. <u>OR</u> Press the number on the keypad that corresponds with your selection.	
3.	Press [CANCEL] to return to the Idle Prompt.	
4.	Stop.	

6.2 Main Menu Options

Note

 The items available in the terminal's main menu are:

No.	NAME	DESCRIPTION
1	Reports	Configure report settings and print various reports.
2	Merchant Settings	Set security, authorization, receipt header and trailer, etc.
3	Operation Settings	Set receipt printing options, Store & Forward settings, connected peripherals, etc.
4	Hosts Settings	View or modify merchant and terminal IDs, authorization and batch phone numbers, print EDC Report.
5	System Settings	Time & Date, PIN Pad options, Encryption keys, Fraud Control, etc.
6	Communications	Configure communication parameters and settings.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.3 Reports

The first menu option is the Report Menu. This generates eight different report options:

MENU	DESCRIPTION
	<input type="checkbox"/> Default Report
	<input type="checkbox"/> Current Report
	<input type="checkbox"/> History Report
	<input type="checkbox"/> Display Trans
	<input type="checkbox"/> Tip Report
	<input type="checkbox"/> FileSys Report

REPORT TYPES You will be prompted in the Current Report sub-menu to choose a report type. When the setting is saved at the end of the Current Report process, the Report Type specified is the type of report printed for a Default Report and a Batch Report. Below is a list of report types and their definitions.

REPORT	DEFINITION
Condensed Report	This type of report will print the transaction number, card type, transaction type, last four digits of the account number, and the amount of the transaction.
Short Report	This type of report will print the transaction type and the amount of the transaction.
Journal Report	This type of report will print a full copy of each transaction.
Totals Only	This type of report will print daily totals only.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.3.1 Default Report

Note

I This report lists the terminal's daily transactions in a format that is configured in the **Current Report** menu. Current Report is described on the next page.

E **Example:** I print out a current report every time there is a change in shifts. To print this report quickly and easily I set it as my default report.

STEP	ACTION	DISPLAY
1.	From the Main Menu press [ENTER] . <u>OR</u> Press [1] to access the Reports Menu.	MAIN MENU: 1. Reports 2. Merchant Settings 3. Operation Settings 4. Hosts Settings
2.	Input the Password and press [ENTER] .	ENTER PASSWORD:
3.	From the Reports Menu press [ENTER] <u>OR</u> Press [1] to select Default Report	REPORTS: 1. Default Report 2. Current Report 3. History Report 4. Display Trans.
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.3.2 Current Report

Note

I This report lists the terminal's daily transactions in a format that can be customized. You can choose this report as your default report by saving it when the terminal asks: "Save as Default?" If yes, press ENTER, if no then press the CANCEL button.

E **Example:** I want a one-time report of Void transactions only so I printed a current report selecting VOID as the transaction type. I did not want to save it as my default report so I pressed CANCEL when prompted.

STEP	ACTION	DISPLAY
1.	From the Reports menu, press [2] to select Current Report.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>REPORTS:</p> <ol style="list-style-type: none"> 1. Default Report 2. Current Report 3. History Report 4. Display Trans. </div>
2.	<p>Use the [▲] & [▼] keys to scroll through the Report Type options then press [ENTER] to select.</p> <p><u>OR</u></p> <p>Press the number corresponding with your selection.</p> <p>If Clerk/Server mode is enabled, terminal prompts all or specific clerk/server. Refer to Step 5.</p>	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>CUR. REPORT TYPE:</p> <ol style="list-style-type: none"> 1. Condensed Rprt 2. Short Report 3. Journal Report 4. Totals Only </div>

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

Current Report, Continued

STEP	ACTION	DISPLAY
3.	Scroll through the EDC Type options then press [ENTER] to select. <u>OR</u> Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> SELECT PMT TYPE: 1. ALL 2. CREDIT 3. DEBIT 4. EBT </div>
4.	Scroll through the Card Type options then press [ENTER] to select. <u>OR</u> Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> ENTER CARD TYPE: 1. ALL 2. Visa 3. MasterCard 4. AMEX </div>
5.	Scroll through the options then press [ENTER] to select. <u>OR</u> Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> SELECT CLERK 1. ALL 2. Spec. Srvr/Clerk </div>
6.	If a specific clerk/server is selected, terminal prompts for clerk/server ID. Otherwise, skip to Step 5. Enter clerk/server ID then press [ENTER] .	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> ENTER CLERK ID: <hr/> </div>
7.	If clerk/server mode is not enabled, By Clerk/Server# will not be a choice. Scroll through Sorting Options then press [ENTER] to select. <u>OR</u> Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> SORT METHOD: 1. By Trans # 2. By Card Type (3. By Srvr/Clerk#) </div>
8.	Transaction types include All, Sale, Forced, Verify, Return, Void Sale, Void return and Void Forced. Scroll through the Transaction Type options then press [ENTER] to select. <u>OR</u> Press the number corresponding with your selection	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> SELECT TRAN. TYPE 1. ALL 2. SALE 3. FORCED 4. POSTAUTH </div>

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

9.	To	THEN	Set Cur. Defaults ENTR=YES, CANCEL=NO
	Save this as your default report	Press [ENTER]	
	Keep your current default setting	Press [CANCEL]	
10.	Stop.		

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

Transaction types on Report

Note

I The Condensed Report will list the different transaction types with 2-letter designations. The following table explains the transaction designators:

DESIGNATOR	TRANSACTION TYPE
SL	Sale
RT	Return
VE	Verify
TK	Forced
VS	Void Sale
VR	Void Return
VF	Void Forced
OP	Open Tab
TB	Closed Tab
CT	Continue Tab

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

Totals Only Report

Journal Report

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.3.3 History Report

Note

I The history reports prints batch totals for the preceding 300 batches. If there are three different EDC types programmed into the terminal, each of the three creates its own batch information. This means that a History Report would be able to print information for the last 100 days.

E **Example:** I want to balance my terminal against last month's statement. Print a History report starting with the first day of last month and ending with the last day. Select the Per Batch option for the individual batch totals and the overall total.

STEP	ACTION	DISPLAY
1.	From the Reports menu, press [3] to select History Report	REPORTS: 1. Default Report 2. Current Report 3. History Report 4. Display Trans.
2.	Using the numeric keypad input the batch date you would like the report to begin with then press [ENTER] .	From Batch Date: MM/DD/YYYY
3.	Using the numeric keypad input the batch date you would like the report to end with then press [ENTER] .	To Batch Date: MM/DD/YYYY
4.	Use the [▲] & [▼] keys to scroll through the EDC Type options then press [ENTER] to select. <u>OR</u> , Press the number corresponding with your selection.	SELECT PMT TYPE: 1. ALL 2. CREDIT 3. DEBIT 4. EBT

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

History Report, Continued

STEP	ACTION	DISPLAY

6.3.6 File System Report

Note

I The File System Report is available as an Optional feature of the application. This report will list the number of records (transactions) currently stored in the terminal for each EDC type. The report also lists how many more transactions of each EDC type the terminal can store if only that EDC type is processed.

STEP	ACTION	DISPLAY
1.	From the Reports menu, press [6] to select File System Report	REPORTS: 3. History Report 4. Display Trans. 5. Tip Report 6. FileSys Report
2.	The File System Report will be printed.	
3.	Stop.	

Sample of File System Report receipt

Note

The values displayed in the sample reports are reflective of one POS Terminal model. Reports printed from other models will reflect the memory capacity of that model.

```

6.4 Merchant Settings

This menu contains eight different functions that can be changed manually, if necessary. They are:

	<input type="checkbox"/> Authorizations
	<input type="checkbox"/> Security Settings
	<input type="checkbox"/> Edit Header
	<input type="checkbox"/> Edit Trailer
MENU	<input type="checkbox"/> Set Batch Time
DESCRIPTION	<input type="checkbox"/> Additional Prompts
	<input type="checkbox"/> Set Cash EDC
	<input type="checkbox"/> Clerk/Server Name

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.1 Authorizations

6.4.1.1 Trans. Types

Note

I This function enables, disables or sets password protection for specific transaction types, such as Voids, Returns, Forced Sales, etc. For all EDC Types the Sale transaction cannot be disabled or password protected. Some transaction types are disabled by the Host and cannot be enabled.

E **Example:** As the Manager of the store, I don't want anyone to process a Void or Return but me. Set the Void and Return functions to Manager Only. The password will then be required to process those transactions.
*Remember the password is either the default current date, MMDDYYYY, or the user specified 8-digit password.

STEP	ACTION	DISPLAY
1.	From the Main Menu press [2] to access Merchant Settings	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>MAIN MENU:</p> <ol style="list-style-type: none"> 1. Reports 2. Merchant Settings 3. Operation Settings 4. Hosts Settings </div>
2.	Press [1] to access Authorization	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>MERCHANT PARAMS:</p> <ol style="list-style-type: none"> 1. Authorizations 2. Security Settings 3. Edit Header 4. Edit Trailer </div>

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

Transaction Type, Continued

STEP	ACTION	DISPLAY
3.	Input the Password and press [ENTER]	ENTER PASSWORD:
4.	Press [1] to edit authorization for Transaction Types	AUTHORIZATION 1. Trans. Types 2. Card Types 3. Debit Prompt
5.	Use the [▲] & [▼] keys to scroll through the EDC Type options then press [ENTER] to select. <u>OR</u> Press the number corresponding with your selection.	SELECT PMT TYPE: 1. CREDIT 2. DEBIT 3. EBT 4. GIFT
6.	Scroll to select the Transaction Type then press [ENTER] . <u>OR</u> Press the number corresponding with your selection.	CREDIT 1. FORCED (EN) 2. AUTH (EN) 3. RETURN (EN) 4. VOID/SALE (EN)  Information in the parenthesis is the current setting EN – Always Enabled DIS – Disabled MGR – Password Protected
7.	Scroll to select Enable, Disable or Manager Only for the Transaction Type then press [ENTER] . <u>OR</u> Press the number corresponding with your selection.	CREDIT FORCED 1. Disabled 2. Always Enabled 3. Pswd Protected
8.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.1.2 Card Types

Note

I This function allows the user to enable or disable specific card types, such as Visa, MasterCard and American Express.

E **Example:** We are not set up to accept American Express cards but sometimes my cashier takes them by mistake, which is a problem. Disable the AMEX card type and the terminal will post an error as soon as the card is swiped.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [1] to access Authorizations	MERCHANT PARAMS: 1. Authorizations 2. Security Settings 3. Edit Header 4. Edit Trailer
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Press [2] to edit authorization for Card Types	AUTHORIZATION 1. Trans. Types 2. Card Types 3. Debit Prompt
4.	Use the [▲] & [▼] keys to select the Card Type then press [ENTER]. <u>OR</u> , Press the number corresponding with your selection	Choose Card Type 1. Visa + 2. MasterCard + 3. AMEX + 4. DCI-DISC +
5.	Scroll to select Enable or Disable for Card Type then press [ENTER]. <u>OR</u> Press the number corresponding with your selection.	Visa + 1. Disabled 2. Always Enabled I * A '+' indicates the card type is enabled and a '-' indicates disabled.
6.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.1.3 Debit Prompt

Note

I When this function is enabled the terminal will prompt the user to select CREDIT or DEBIT when a card is swiped. It will only prompt the user to make a selection when the payment type is CREDIT. And it will be invalid for choosing debit when it is in on paper mode.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [1] to access Authorizations	MERCHANT PARAMS: 1. Authorizations 2. Security Settings 3. Edit Header 4. Edit Trailer
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Press [3] to select Debit Prompt	AUTHORIZATION 1. Trans. Types 2. Card Types 3. Debit Prompt
4.	Current setting is displayed in the first line. Press [1] to turn Debit Prompt OFF. <u>OR</u> Press [2] to turn Debit Prompt ON.	DEBIT PROMPT: I 1. OFF 2. ON
5.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.2 Security Settings

Security settings have five sub-menus. See the chart below option information.

MENU	DESCRIPTION
	<ul style="list-style-type: none"> ● User Password ● Batch ● Secure Card ● Card Manual Entry

FUNCTION	OPTIONS
User Password	<ul style="list-style-type: none"> ● Set the User defined password

Card Manual Entry	<ul style="list-style-type: none"> ● Disabled ● Always Enabled(Default setting) ● Password Protected

6.4.2.1 User Password

Note

I This function allows you to set a user specified password. The POS Terminal POS terminal password defaults to the current date (MMDDYYYY). This password changes daily.

It is advised that this default password be changed upon receipt of

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

the terminal. The new password should be a series of eight non-sequential numbers that can be easily remembered. Using birthdays or anniversaries is not advised as unauthorized persons can easily discover these passwords.

If the new User Password is forgotten, you must redownload the Parameters to re-establish the default password.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu press [2] for Security Settings.	MERCHANT PARAMS: 1. Authorizations 2. Security Settings 3. Edit Header 4. Edit Trailer
2.	Press [1] for User Password.	SECURITY SWITCH: 1. User Password 2. Batch 3. Secure Card
3.	Press [ENTER] to change the password.	Change Password? ENTR=YES, CANC=NO
4.	The password is anything other than the default password (MMDDYYYY), enter the OLD password then press [ENTER] .	Old Password:
5.	Enter the NEW password then press [ENTER] . Note: The password must be one to sixteen digits in length.	ENTER PASSWORD: *****
6.	Re-enter the NEW password then press [ENTER] .	REENTER PASSWORD *****
7.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.2.2 Security Batch

Note

I Use this sub-menu to secure the Batch function.

E **Example:** I want to make sure that no one closes the batch but me. Set the Batch function to be password protected.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [2] to access Security Settings.	MERCHANT PARAMS: 1. Authorizations 2. Security Settings 3. Edit Header 4. Edit Trailer
2.	Press [2] to secure the Batch function.	SECURITY SWITCH: 1. User Password 2. Batch 3. Secure Card
3.	Press [1] to Password Protect the function <u>OR</u> Press [2] to enable the function.	Batch: I 1. Pswd Protected 2. Always Enabled
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.2.3 Security Card

Note

I Use this sub-menu to change the settings to help you to verify that the account number swiped matches the number on the front of the card.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [2] to access Security Settings.	MERCHANT PARAMS: 1. Authorizations 2. Security Settings 3. Edit Header 4. Edit Trailer
2.	Press [4] for Secure Card.	SECURITY SWITCH: 1. User Password 2. Batch 3. Secure Card
3.	The current setting is displayed in the first line. Scroll to select the option then press [ENTER] .	Secure Card: I 1. No Security 2. Last 4 Digits 3. All Digits 4. Display Account
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.2.4 Card Manual Entry

Note

I Use this sub-menu to enable, disable or password protect manual entry of a credit transaction.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [2] to access Security Settings.	MERCHANT PARAMS: 1. Authorizations 2. Security Settings 3. Edit Header 4. Edit Trailer
2.	Press [4] for Card manual Entry.	SECURITY SWITCH: 2. Batch 3. Secure Card 4. Card Man. Entry
3.	Press [1] for all EDC types. <i>OR</i> Select the specific EDC type.	SELECT PMT TYPE: 1. ALL 2. CREDIT 3. EBT 4. CHECK
4.	Enter the password then press [ENTER] .	ENTER PASSWORD:
5.	Scroll to select the option then press [ENTER] .	Card Man. Entry:2 1. Disabled 2. Always Enabled 3. Pswd Protected
6.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.3 Edit Header/Trailer

Note

I These functions allow you to customize the receipt header and trailer. Both the header and trailer are five-lines with 32-characters per line.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [3] to Edit the Receipt Header <u>OR</u> , Press [4] to Edit the Receipt Trailer	MERCHANT PARAMS: 1. Authorizations 2. Security Settings 3. Edit Header 4. Edit Trailer
2.	Scroll to select the option then press [ENTER] .	EDIT HEADER: 1. Header Text 1 2. Header Text 2 3. Header Text 3 4. Header Text 4
3.	Press ↓ to move cursor to the right Press [FUNC] to switch Insert/Overwrite Mode Press ↑ to move cursor to the left	HEADER TEXT 1 PAX TOWN
4.	Input in the text that you want printed out on the receipt. (See instructions below)	
5.	To change the letters, first press the number key that has the letter engraved on the top then press the [ALPHA] key to cycle through the other characters also on that key <u>For example:</u> The #2 key on the keypad also has the letters A , B and C printed on it. When you first press this key, the display will show the number 2 , by pressing the [ALPHA] key it will cause the display to change from a 2 to the letter A . Press [ALPHA] again and it becomes a B and finally C . Pressing another numeric key will advance the cursor on the display to the next position. Use the ↓ key to move the cursor to the right.	
6.	Press [ENTER] to Save Changes <u>OR</u> Press [CANCEL] to Abort Changes	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	Stop.
----	--------------

6.4.4 Set Batch Time

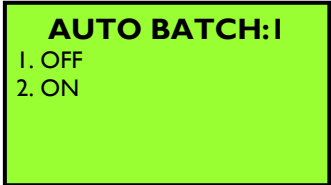

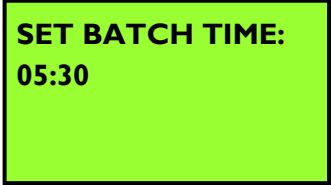

Note

I This function sets the specific time the terminal prints a batch report and clears its memory for the next day. Set Batch Time is for Host Based Auto Batch EDC types only. The Host is not contacted during this process. Please note the batched transactions are cleared from memory with the first transaction of the new batch.

E **Example:** The AutoBatch report is printing in the middle of the day. I accessed the Set Batch Time function and changed the time. Now the report prints after we have closed for the day.

STEP	ACTION	DISPLAY						
1.	From the Merchant Settings menu, press [5] to set the batch time.	MERCHANT PARAMS: 2. Security Settings 3. Edit Header 4. Edit Trailer 5. Set Batch Time						
2.	Input the Password and press [ENTER]	ENTER PASSWORD:						
3.	Scroll to select the host then press [ENTER] . Note: If the Host is MPSTC, it will display MPSTC.	SELECT HOST 1. MPSHC 2. MPSGC						
4.	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 50%;">If AutoBatch is</th> <th style="width: 50%;">Then</th> </tr> </thead> <tbody> <tr> <td>supported by Host</td> <td>Proceed to #5,</td> </tr> <tr> <td>not supported by Host</td> <td>Than skip to #7.</td> </tr> </tbody> </table>	If AutoBatch is	Then	supported by Host	Proceed to #5,	not supported by Host	Than skip to #7.	
If AutoBatch is	Then							
supported by Host	Proceed to #5,							
not supported by Host	Than skip to #7.							

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

5.	Select whether to support auto batch	
6.	Input the desired time in military (24-hour) time and press [ENTER]	
7.	"Auto Batch" is not supported by Host.	
8.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.5 Additional Prompts

This menu contains different functions that can be enabled or disabled. They are:

	<input type="checkbox"/> Clerk/Server ID Mode
MENU	<input type="checkbox"/> Invoice Mode
DESCRIPTION	<input type="checkbox"/> CashBack Prompt
	<input type="checkbox"/> Table Mode(RESTAURANT)
	<input type="checkbox"/> Guest No. Mode(RESTAURANT)

6.4.5.1 Clerk/Server ID Mode

Note

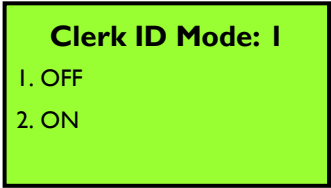

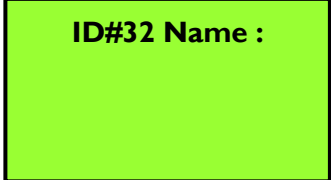

I This feature prompts you to enter the server/clerk ID number and is implemented in both **restaurant (server) and retail (clerk)** applications. You can also designate up to one-hundred (100) server/clerk name—ID combinations starting from ID #1 up to ID #100. For Retail, this display name is “Clerk”, and for Restaurant, display name is “Server”.

E **Example:** I would like the receipts to list the clerk who made the sale. Enable Clerk mode and enter all of the clerk’s names starting with Clerk ID#1.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [7] to set the Additional Prompts.	MERCHANT PARAMS: 4. Edit Trailer 5. Merchant Fee 6. Set Batch Time 7. Additional Prompts
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	The display represents a retail setup. Press [1] to select Clerk ID mode.	Additional Prmpt 1. Server ID Mode 2. Invoice Mode 3. CashBack Prompt

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

Clerk/Server ID Mode, Continued

STEP	ACTION	DISPLAY
4.	<p>The default setting is OFF.</p> <p>Press [1] to disable Clerk ID mode.</p> <p><u>OR</u></p> <p>Press [2] to enable Clerk ID Mode.</p>	 <p>Clerk ID Mode: I 1. OFF 2. ON</p>
5.	<p>Enter the first clerk number/name designation to be saved then press [ENTER]. (System defaults to clerk number 1).</p>	 <p>ENTER CLERK ID: 1</p>
6.	<p>Enter the clerk name using the same method as editing the header information (maximum 19 characters). Press [ENTER] when name is complete.</p>	 <p>ID #1 Name:</p>
7.	<p>When all of the clerk names have been entered, press [CANCEL] to accept the entered names.</p>	 <p>ID#32 Name :</p>
8.	<p>Stop.</p>	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.5.2 Invoice Mode

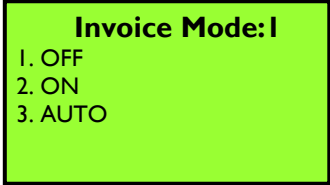

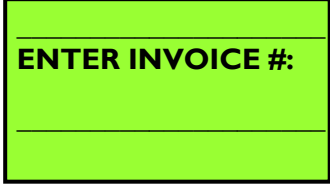

Note

I Invoice mode can be disabled, enabled (terminal prompts for invoice number) or set to Auto. (A starting number is entered when enabled; the terminal then increments the number with each transaction.)
The Invoice Mode sub-menu cannot be accessed if there are current transactions in the open batch. The message “BATCH OUT PLEASE” is displayed.
If there are failed Offline transactions, the message “MUST UPLOAD OR DELETE FAILED TRN” is displayed when the invoice mode feature is selected.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu press [7] for Additional Prompts.	MERCHANT PARAMS: 5. Merchant Fee 6. Set Batch Time 7. Additional Prompts 8. Cash EDC Setup
2.	Input the Password and press [ENTER] .	ENTER PASSWORD:
3.	If there are no transactions in the terminal database, press [2] for Invoice Mode.	Additional Prmpt 1. Clerk ID Mode 2. Invoice Mode 3. Debit Account 4. CashBack Prompt
4.	Press [2] for Invoice Mode. If there are transactions in the database, they must be batched out before Invoice Mode can be accessed.	BATCH OUT PLEASE

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

Invoice Mode, Continued

STEP	ACTION	DISPLAY
5.	<p>The defaulting setting is OFF.</p> <p>Press [1] to disable Invoice Mode</p> <p><u>OR</u></p> <p>Press [2] to enable Invoice Mode (terminal will prompt for invoice number when processing transaction).</p> <p><u>OR</u></p> <p>Press [3] for automatic numbering (terminal will increment invoice number with each transaction).</p>	
6.	<p>If Auto was selected, enter the starting invoice number then press [ENTER].</p>	
7.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.5.3 CashBack Prompt

Note

I CashBack Prompt can be disabled, or enabled (terminal prompts for cashback amount).

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu press [7] for Additional Prompts.	MERCHANT PARAMS: 5. Merchant Fee 6. Set Batch Time 7. Additional Prompts 8. Cash EDC Setup
2.	Input the Password and press [ENTER] .	ENTER PASSWORD:
3.	If there is no transaction in the terminal database, press [4] for CashBack Prompt.	Additional Prmpt 1. Clerk ID Mode 2. Invoice Mode 3. Debit Account 4. Cashback Prompt
4.	The defaulting setting is OFF. Press [1] to disable CashBack Prompt. <u>OR</u> Press [2] to enable CashBack Prompt.	CashBack Prmpt: I 1. OFF 2. ON
5.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.5.4 Table Mode

Note

I Table mode can be disabled, enabled (terminal prompts for table number). This option is only applicable for Restaurant versions of the software.

STEP	ACTION	DISPLAY
6.	From the Merchant Settings menu press [7] for Additional Prompts.	MERCHANT PARAMS: 6. Set Batch Time 7. Additional Prompts 8. Cash EDC Setup 9. Clerk/Server Name
7.	Input the Password and press [ENTER] .	ENTER PASSWORD:
8.	If there is no transaction in the terminal database, press [5] for Table Mode.	Additional Prmpt 2. Invoice Mode 3. Debit Account 4. Cashback Prompt 5. Table Mode
9.	The defaulting setting is OFF. Press [1] to disable Table Mode. <u>OR</u> Press [2] to enable Table Mode.	Table Mode:! 1. OFF 2. ON
10.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.5.5 Guest No. Mode

Note

I Guest No. Mode can be disabled, enabled (terminal prompts for guest number). This option is only applicable for Restaurant versions of the software.

STEP	ACTION	DISPLAY
11.	From the Merchant Settings menu press [7] for Additional Prompts.	MERCHANT PARAMS: 6. Set Batch Time 7. Additional Prompts 8. Cash EDC Setup 9. Clerk/Server Name
12.	Input the Password and press [ENTER] .	ENTER PASSWORD:
13.	If there is no transaction in the terminal database, press [6] for Guest No. Mode	Additional Prmpt 3. Debit Account 4. Cashback Prompt 5. Table Mode 6. Guest No. Mode
14.	The defaulting setting is OFF. Press [1] to disable Guest No. Mode. <u>OR</u> Press [2] to enable Guest No. Mode.	Guest No. Mode: I 1. OFF 2. ON
15.	Stop.	

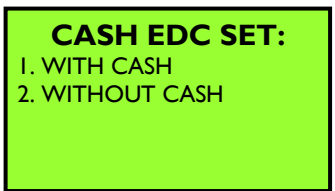

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.6 Set Cash EDC

Note

I Your POS Terminal allows you to record cash sales in your reporting. To do so, the Cash EDC mode must be enabled. Cash EDC is for record keeping only. Cash transactions are totaled and listed on reports.

E **Example:** I'm taking my POS Terminal to a craft show this weekend. Is there any way I can use the terminal to keep track of my cash transactions? Yes, Enable Cash EDC and change the payment mode to Cash for every cash sale. This will help you to keep track and give you a receipt with your business information for the customer.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [8] to Set Cash EDC	 <p>MERCHANT PARAMS 6. Set Batch Time 7. Additional Prompts 8. Cash EDC Setup 9. Clerk/Server Name</p>
2.	Input the Password and press [ENTER]	 <p>ENTER PASSWORD:</p>
3.	With Cash is the default setting. Press [1] to Set EDC With Cash <u>OR</u> Press [2] to Set EDC Without Cash	 <p>CASH EDC SET: 1. WITH CASH 2. WITHOUT CASH</p>
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.4.7 Clerk/Server Name

Note

 Change the clerk and/or server name.

STEP	ACTION	DISPLAY
1.	From the Merchant Settings menu, press [9] to access Clerk/Server Name	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>MERCHANT PARAMS: 6. Set Batch Time 7. Additional Prompts 8. Cash EDC Setup 9. Clerk/Server Name</p> </div>
2.	Input the Password and Press [ENTER]	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ENTER PASSWORD:</p> </div>
3.	Clear the current entries or not.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>CLEAR CURRENT? ENTER=YES,CANC=NO</p> </div>
4.	Enter the new Clerk ID then press [ENTER] .	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ENTER CLERK ID: _____</p> </div>
5.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.5 Operation Settings

This Menu has nine options that can be enabled or disabled, manually through the terminal.

They are:

	<input type="checkbox"/> No-Paper Mode
	<input type="checkbox"/> Buzzer Setup
	<input type="checkbox"/> Operation Mode
	<input type="checkbox"/> Battery Saver
	<input type="checkbox"/> Disclaimer Setup
MENU	<input type="checkbox"/> Halo Setup
DESCRIPTION	<input type="checkbox"/> Print Setup
	<input type="checkbox"/> Receipt Print
	<input type="checkbox"/> Peripherals

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.5.1 No Paper Mode

Note

I This function enables or disables the printer or sets NPM to automatic. When disabled, the terminal will not print a receipt for any transaction and reports are not accessible. When set to **AUTO**, the terminal automatically puts itself in **NPM** when it runs out of paper. When NPM is enabled, the idle screen is flashing NPM instead of arrow.

E **Example #1:** I need to process a few Forced transactions and I don't need receipts for them so I will put the terminal in No Paper Mode. This way I will not waste any paper.

Example #2: The screen is flashing NPM. This means that the terminal is in No Paper Mode. I will replace the paper if necessary and disable NPM.

STEP	ACTION	DISPLAY
1.	From the Operation Settings menu, press [1] to access No Paper mode.	OPER. SETTINGS: 1. No-Paper Mode 2. Buzzer Setup 3. Operation Mode 4. Battery Saver
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Use the [▲] & [▼] keys to your selection and then press [ENTER] . <u>OR</u> , Press the number corresponding with your selection.	NoPaper Mode: 3 1. OFF 2. ON 3. AUTO
4.	Press [ENTER] to complete <u>OR</u> Press [CANCEL] to abort	ARE YOU SURE? ENTR=YES, CANC=NO
5.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.5.2 Buzzer Setup

Note

I This feature enables and disables the terminal's built-in buzzer, which sounds a tone when specific functions are performed or buttons are pressed.

E **Example:** I would like to know when the Menu button is pressed so I enabled the Buzzer function. The terminal now beeps whenever the Menu button is pressed.

STEP	ACTION	DISPLAY
1.	From the Operation Settings menu, press [2] for Buzzer Setup.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>OPER. SETTINGS:</p> <ul style="list-style-type: none"> 1. No-Paper Mode 2. Buzzer Setup 3. Operation Mode 4. Battery Saver </div>
2.	Default setting is ON. Press [1] to disable the buzzer. <u>OR</u> Press [2] to enable the buzzer.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Buzzer Setting: 2</p> <ul style="list-style-type: none"> 1. OFF 2. ON </div>
3.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.5.3 Operation Mode

Note

I This feature sets the terminal to one of two modes: **Normal Mode**, which is used for real transactions and **Demo Mode**, which is used for training.
After working in Demo Mode, make sure to return to Normal Mode in order to perform real transactions.

E **Example:** I have a new employee that needs to be trained on the POS Terminal. I'll put the terminal in Demo Mode. That way the new employee can be trained without interfering with business.

STEP	ACTION	DISPLAY
1.	From the Operation Settings menu, press [3] for Operation Mode.	OPER. SETTINGS: 1. No-Paper Mode 2. Buzzer Setup 3. Operation Mode 4. Battery Saver
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	The defaulting setting is Normal Mode. Use the [▲] & [▼] keys to make your selection and then press [ENTER] . <u>OR</u> , Press the number corresponding with your selection	Operation Mode:! 1. Normal Mode 2. Demo Mode
4.	Press [ENTER] to accept the change. OR Press [CANCEL] to cancel.	ARE YOU SURE? ENTR=YES, CANC=NO
5.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.5.4 Battery Saver

Note

 This function is for wireless terminals and for models equipped with back-up batteries, or else “NOT AVAILABLE” is displayed

Not available for S80.

6.5.5 Disclaimer Setup

Note

I This function prints the following disclaimer at the bottom of every credit card transaction.

E **Disclaimer:**
“I AGREE TO PAY ABOVE TOTAL AMOUNT ACCORDING TO CARD ISSUER AGREEMENT (MERCHANT AGREEMENT IF CREDIT VOUCHER).”

STEP	ACTION	DISPLAY
1.	From the Operation Settings menu, press [5] for Print Disclaimer.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>OPER. SETTINGS:</p> <p>2. Buzzer Setup 3. Operation Mode 4. Battery Saver 5. Disclaimer Setup</p> </div>
2.	<p>The default setting is ON.</p> <p>Scroll to make your selection and then press [ENTER].</p> <p><u>OR</u></p> <p>Press the number corresponding with your selection.</p>	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Prt Dscl. Mode:2</p> <p>1. OFF 2. ON</p> </div>
3.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.5.6 Halo Setup

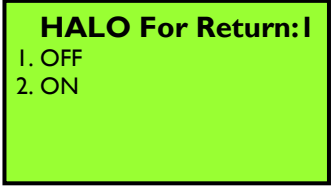

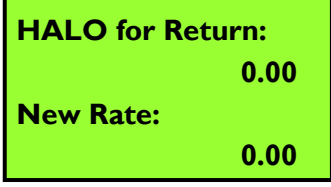

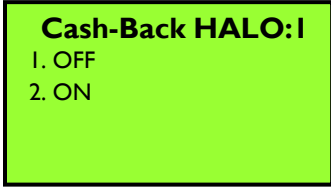

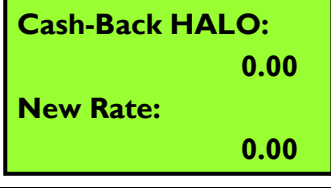

Note

I The Set Halo option sets an amount limit that cannot be exceeded. This option can be set for all types of sales, all types of returns, and cash back on debit transactions.

E **Example:** Store policy is not to allow a Cash Back amount on a debit sale to exceed \$20. If I set the cash back Halo of that amount, my new counter people will not be able to give back an amount greater than \$20 in error.

STEP	ACTION	DISPLAY
1.	From the Operation Settings menu, press [6] to Set Halo values.	OPER. SETTINGS: 3. Operation Mode 4. Battery Saver 5. Disclaimer Setup 6. Halo Setup
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	The default setting is OFF. Press the number corresponding with your selection. <i>If the Halo was disabled, continue with step 5.</i>	HALO For Sale:! 1. OFF 2. ON
4.	The current HALO is displayed in the first line. Input the new maximum amount for a sale then press [ENTER] .	HALO for Sale: 0.00 New Rate: 0.00

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

5.	<p>The default setting is OFF.</p> <p>Use the [▲] & [▼] keys to find your selection and then press [ENTER].</p> <p><u>OR</u></p> <p>Press the number corresponding with your selection.</p> <p><i>If the Halo was disabled, continue with step 7.</i></p>	
6.	<p>The current HALO is displayed in the first line.</p> <p>Input the new maximum amount for a return then press [ENTER].</p>	
7.	<p>The default setting is OFF.</p> <p>Use the [▲] & [▼] keys to find your selection and then press [ENTER].</p> <p><u>OR</u></p> <p>Press the number corresponding with your selection.</p>	
8.	<p>The current HALO is displayed in the first line.</p> <p>Input the new maximum amount for cash back then press [ENTER].</p>	
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.5.7 Print Setup

Note

I This function prints a setup report. The report lists the settings of all the terminal options.

E **Example #1:** How do I know what my Fraud Control options are set to? Print a Setup Report.

Example #2: I just changed the address in the receipt header. I want to see what it looks like when printed so I will print a Setup Report.

STEP	ACTION	DISPLAY
1.	From the Operation Settings menu, press [7] to print a Setup Report.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>OPER. SETTINGS:</p> <ul style="list-style-type: none"> 4. Battery Saver 5. Disclaimer Setup 6. Halo Setup 7. Print Setup </div>
2.	Input the Password and press [ENTER] .	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ENTER PASSWORD:</p> </div>
3.	The terminal prints out the setup report.	
4.	Stop.

This area reflects the Application currently loaded in the terminal.

Individual Merchant Header, Trailer and Comment Line information is listed in this area.

A plus (+) indicates the Credit Card is supported. A minus (-) indicates the card is not supported.

This area of the Set Up Report lists the transaction types that are supported by the different EDC Hosts. If the character in the **Host** column is a plus (+), the Host supports that type of transaction. If the character is a minus (-), the transaction type is not supported.

If the character in the **Chngd** (Changed) column is a plus (+), a change in the setting has been made.

If the character in the **Mrch** (Merchant) column is a minus (-) and the Chngd character is also a minus, the Host setting is in effect. If the Mrch character is a minus and the Chngd character is a plus, the transaction type has been disabled by the Merchant.

NOTE: This document is CONFIDENTIAL and must be used exclusively for internal purposes. It is not to be duplicated, published, or disclosed without prior written permission.

6.6.4 Host URL Params

Note

i This function is used for IP address and Port editing manually in the terminal.

STEP	ACTION	DISPLAY
1.	From the Hosts Settings menu press [4] to enter connection settings.	HOST PARAMS: 1. Host Parameters 2. Host Phones 3. Print EDC Setup 4. Host URL Params
2.	Input the Password and press [ENTER] .	ENTER PASSWORD:
3.	Scroll to select the host then press [ENTER] . Note: If the Host is MPSTC, it will display MPSTC.	SELECT HOST 1. MPSHC 2. MPSGC
4.	Use the [▲] & [▼] keys to find your selection and then press [ENTER] . Or Press the number corresponding with your selection.	PHONE TYPE: 1. Auth. URLs 2. Batch URLs
5.	Use the [▲] & [▼] keys to find your selection and then press [ENTER] . Or Press the number corresponding with your selection.	EDIT URL: 1. Host URL #1 2. Host URL #2
6.	Use the [▲] & [▼] keys to find your selection and then press [ENTER] . Or Press the number corresponding with your selection.	URL SETTINGS: 1. URL 2. Port
7.	Input the desired URL address or port number then press [ENTER] .	Host URL:

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

8.	Stop.
----	--------------

6.6.5 AutoDial Setup

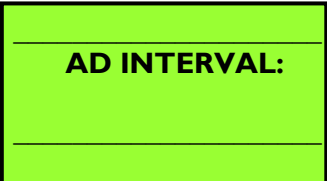

Note

I The AutoDial function is the automatic execution of the manual batch process. If the terminal capture type is Host Manual or Terminal Capture, the AutoDial feature will automatically perform the manual batch function. AutoDial is not applicable if the terminal capture type is AutoBatch.

E **Example:** Since I don't always have time to batch the terminal at the end of the business day, I set the AutoDial time to automatically batch out an hour after the store closes.

STEP	ACTION	DISPLAY
1.	From the Hosts Settings menu press [5] to enter connection settings.	HOST PARAMS: 2. Host Phones 3. Print EDC Setup 4. Host URL Params 5. AutoDial Setup
2.	Input the Password and press [ENTER] .	ENTER PASSWORD:
3.	Scroll to select the host then press [ENTER] . Note: If the Host is MPSTC, it will display MPSTC.	SELECT HOST 1. MPSHC 2. MPSGC
4.	Use the [▲] & [▼] keys to find your selection and then press [ENTER] . Or Press the number corresponding with your selection.	AUTODIAL SETUP: 2 1. ON 2. OFF
5.	If [1] is selected in step 4, enter the start time and then press [ENTER] .	<hr/> START AD AT: HH:MM <hr/>

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.	Enter the stop time then press [ENTER] . Stop time is usually one hour after start time.	
7.	Enter the AutoDial time interval then press [ENTER] . The interval is usually 5 minutes.	
8.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7 System Settings

This menu consists of different functions that can be changed manually.

	<input type="checkbox"/> Date/Time Setup
	<input type="checkbox"/> Batch Number
	<input type="checkbox"/> Working Mode
MENU	<input type="checkbox"/> Pre-Dial Call
DESCRIPTION	<input type="checkbox"/> Database
	<input type="checkbox"/> PIN Pad Settings
	<input type="checkbox"/> Keys Injection
	<input type="checkbox"/> App Management

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.1 Date/Time Setup

Note

I All POS Terminals include an internal clock that keeps the time and date. The clock keeps time in a 24-hour or military format. This function sets the internal clock.

STEP	ACTION	DISPLAY
1.	From the Main Menu press [5] to access System Settings	<p>MAIN MENU:</p> <ul style="list-style-type: none"> 2. Merchant Settings 3. Operation Settings 4. Hosts Settings 5. System Settings
2.	Press [ENTER]	<p>SYSTEM OPTIONS:</p> <ul style="list-style-type: none"> 1. Date/Time Setup 2. Batch Number 3. Working Mode 4. Pre-Dial Call
3.	Verify that the current Date and/or Time are incorrect. Input the correct date using MM/DD/YY format. Input the correct hour and minutes using Military (24-hour) Format.	<p>07/31/06 MM/DD/YY</p> <p>10:02:49 HH:MM:SS</p>
4.	Verify the time is now correct and press [CANCEL] <u>OR</u> Press [ENTER] to save the modified time.	
5.	Stop	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.2 Batch Number

Note

I This menu option allows the batch number to be changed. Not all Host processors use batch numbers so care should be taken when accessing this function. Verify the current or last closed batch number with the Host Processor before changing.

STEP	ACTION	DISPLAY
1.	From the System Settings menu press [2] to set batch number.	SYSTEM OPTIONS: 1. Date/Time Setup 2. Batch Number 3. Working Mode 4. Pre-Dial Call
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Select the EDC host. Note: If the Host is MPSTC, it will display MPSTC.	SELECT HOST: 1. MPSHC 2. MPSGC
4.	Terminal displays the current batch No. Input the New Batch # and press [ENTER]	New Batch No:
5.	Press [ENTER] to complete <u>OR</u> Press [CANCEL] to cancel	ARE YOU SURE? ENTR=YES, CANC=NO
6.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3 Working Mode

This sub-menu has three options:

MENU	
DESCRIPTION	<input type="checkbox"/> Tip Options
	<input type="checkbox"/> Fraud Control
	<input type="checkbox"/> Local Dup Check

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.1 Tip Options

Note

 These features (listed below) provide the user with multiple Tip options.

The following sub menu options can be found in the Tip Options menu.

MENU	DESCRIPTION
	<input type="checkbox"/> EDC Tip
	<input type="checkbox"/> Tip 1
	<input type="checkbox"/> Tip 2
	<input type="checkbox"/> Tip 3
	<input type="checkbox"/> Edit Confirm
	<input type="checkbox"/> Print TIP Setup

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.1.1 EDC Tip

Note

I EDC Tip allows the user to enable/disable the active tips for individual EDC types.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [3] for Working Mode.	SYSTEM OPTIONS: 1. Date/ Time Setup 2. Batch Number 3. Working Mode 4. Pre-Dial Call
2.	Press [ENTER]	WORKING MODE: 1. Tip Options 2. Fraud Control 3. Comment Opt.
3.	Input the Password and press [ENTER]	ENTER PASSWORD:
4.	Press [ENTER] for EDC Tips.	TIP OPTIONS: 1. EDC Tip 2. Tip 1: (OFF) 3. Tip 2: (OFF) 4. Tip 3: (OFF)
5.	Select the EDC type.	SELECT PMT TYPE: 1. CREDIT 2. DEBIT 3. EBT 4. GIFT
6.	Current setting is displayed in the first line. Press [1] to disable tips for the selected EDC type. OR Press [2] to enable tips for the selected EDC type.	EDC Tip: 2 1. OFF 2. ON
7.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.1.2 Tip1-Tip3

Note

I This function allows you to include up to three tips with each transaction, as well as naming the tips, choosing to have the terminal calculate the tip or total amount and entering a default amount for each tip. For Retail, all tips are processed with the transaction. The following instructions are for Retail terminals only.

E **Example:** The first tip is enabled but the receipt lists it as Tip with no default amount and the Merchant wants it listed as Processing with a default charge of \$10. The tip name can be changed and a default amount set in the Tip Options in Working Mode.

STEP	ACTION	DISPLAY
1.	From the Tip Options menu use the [▲] & [▼] to select the tip you wish to edit then press [ENTER]. <u>OR</u> Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>TIP OPTIONS:</p> <p>1. EDC Tip 2. Tip 1: (OFF) 3. Tip 2: (OFF) 4. Tip 3: (OFF)</p> </div> <p>I</p> <p>* The current Tip status is displayed in parenthesis.</p>
2.	Press [1] to disable the tip or [2] to enable the tip.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Tip 1 (OFF)</p> <p>1. OFF 2. ON</p> </div>
	<p>After turning a tip option ON you will then be prompted to Edit the Tip name.</p> <p>To change the letters, first presses the number key with the letter engraved on top then press the [ALPHA] key to cycle through the other characters on that key.</p> <p><u>For example:</u></p> <p>The #2 key on the keypad also has the letters A, B and C printed on it. When you first press this key, the display will show the number 2, by pressing the [ALPHA] key it will cause the display to change from 2 to the letter A. Continue pressing the [ALPHA] key for the required letter.</p> <p>Modify the tip name then press [ENTER].</p>	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>TIP 1 Name: I N</p> <p>Tip</p> </div>

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

3.	<p>Press [1] to have the terminal calculate the Transaction Total after the Tip amount is entered.</p> <p><u>OR</u></p> <p>Press [2] to have the terminal calculate the Tip amount after the Transaction Total is entered.</p>	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>TIP Entry Method</p> <p>1. Calculate Total</p> <p>2. Calculate Tip</p> </div>
4.	<p>If in Step 3, Calculate Total is selected, enter the default tip amount then press [ENTER].</p> <p><u>OR</u></p> <p>Press [ENTER] to bypass.</p> <p>Note: Current rate is displayed in the first line.</p> <p>The default tip amount will automatically be added to all transactions.</p>	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Tip: 0.00</p> <p>New Rate: 0.00</p> </div>
5.	Stop.	

6.7.3.1.3 Edit Confirm

Note

I Enabling Edit Confirm will cause the terminal to prompt the user to press **[ENTER]** to accept the tip amount or press **[CANCEL]** to prompt for a new tip amount. Edit confirm is supported in **Restaurant only**.

STEP	ACTION	DISPLAY
1.	From the Tip Options menu press [5] for Edit Confirm.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>TIP OPTIONS:</p> <p>2. Tip 1: (OFF)</p> <p>3. Tip 2: (OFF)</p> <p>4. Tip 3: (OFF)</p> <p>5. Edit Confirm</p> </div>
2.	<p>The current setting is displayed in the first line.</p> <p>Press [1] to disable Edit Confirm.</p> <p><u>OR</u></p> <p>Press [2] to enable Edit Confirm.</p>	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Edit Confirm: 2</p> <p>1. OFF</p> <p>2. ON</p> </div>
3.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.1.4 Print Tip Setup

Note

 This function prints a report listing the terminal's tip configuration.

STEP	ACTION	DISPLAY
1.	From the Tip Options menu press [7] to print the Tip Setup report.	TIP OPTIONS: 4. Tip 3: (OFF) 5. Tab Option 6. Edit Confirm 7. Print TIP Setup
2.	Stop.	

Sample of Tip Setup Report

6.7.3.2 Fraud Control Option

Note

I These features (listed below) provide the user with multiple options when setting the parameters for individual card types. This can be accomplished on the POS Terminal or on the terminal.

The following sub menu options can be found in the Fraud Control menu.

MENU	DESCRIPTION
	<input type="checkbox"/> AVS On Swipe
	<input type="checkbox"/> AVS On Card Present
	<input type="checkbox"/> AVS on Card Not Present
	<input type="checkbox"/> Card Present
	<input type="checkbox"/> V-Code

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.2.1 AVS On Swipe

Note

I AVS On Swipe enables AVS prompts on all swiped transactions for individual Credit Card types or for all card types.

E **Example:** The Merchant does not want any AVS prompts when the card is swiped. The AVS On Swipe setting will be changed to None. This will disable the AVS prompts on swiped transactions.

OPTION	DEFINITION
None	There will be no AVS prompts(default)
Address	AVS will prompt for address only
Zip	AVS will prompt for zip code only
Address & Zip	AVS will prompt for address and zip code

STEP	ACTION	DISPLAY
1.	From the Main Menu, press [5] for System Settings	MAIN MENU: 2. Merchant Settings 3. Operation Settings 4. Hosts Settings 5. System Settings
2.	Press [3] for Working Mode.	SYSTEM OPTIONS: 1. Date/Time Setup 2. Batch Number 3. Working Mode 4. Pre-Dial Call

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

AVS On Swipe, Continued

STEP	ACTION	DISPLAY
3.	Press [2] for Fraud Control.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>WORKING MODE:</p> <ol style="list-style-type: none"> 1. Tip Options 2. Fraud Control 3. Comment Opt. </div>
4.	Input the Password and press [ENTER] .	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ENTER PASSWORD:</p> </div>
5.	Press [1] to set the AVS On Swipe.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Fraud Control</p> <ol style="list-style-type: none"> 1. AVS On Swipe 2. AVS On CardPrsnt 3. AVS OnCardNotPrsnt 4. Card Present </div>
6.	Select the card type you wish to modify or press [1] for all card types.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>Select Card Type</p> <ol style="list-style-type: none"> 1. ALL 2. Visa 3. MasterCard 4. AMEX </div>
7.	Press the number that corresponds to the desired AVS Prompt.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>AVS On Swipe</p> <ol style="list-style-type: none"> 1. None 2. Address 3. Zip 4. Address & Zip </div>
8.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.2.2 AVS On Card Present

Note

I AVS On Card Present is a feature that enables AVS prompts on all manual transactions where the card is present for individual Credit Card types or for all card types.

OPTION	DEFINITION
None	There will be no AVS prompts
Address	AVS will prompt for address only
Zip	AVS will prompt for zip code only(default)
Address & Zip	AVS will prompt for address and zip code

STEP	ACTION	DISPLAY
1.	From the Fraud Control menu press [2] to set AVS On Card Present.	Fraud Control 1. AVS On Swipe 2. AVS On CardPrsnt 3. AVS OnCardNotPrsnt 4. Card Present
2.	Select the card type you wish to modify or press [1] for all card types.	Select Card Type 1. ALL 2. Visa 3. MasterCard 4. AMEX
3.	Press the number that corresponds to the desired AVS Prompt.	AVS On CardPr 1. None 2. Address 3. Zip 4. Address&Zip
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.2.3 AVS On Card Not Present

Note

I AVS On Card Not Present is a feature that enables AVS prompts on all manual transactions where the card is **not** present for individual Credit Card types or for all card types.

E **Example:** For added security, the AVS feature that prompts for Address and Zip on all manual entries where the card is not present should be enabled.

OPTION	DEFINITION
None	There will be no AVS prompts
Address	AVS will prompt for address only
Zip	AVS will prompt for zip code only
Address & Zip	AVS will prompt for address and zip code(default)

STEP	ACTION	DISPLAY
1.	From the Fraud Control menu press [3] to set AVS On Card Not Present.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Fraud Control</p> <p>1. AVS On Swipe 2. AVS On CardPrsnt 3. AVS OnCardNotPrsnt 4. Card Present</p> </div>
2.	Select the card type you wish to modify or press [1] for all card types.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Select Card Type</p> <p>1. ALL 2. Visa 3. MasterCard 4. AMEX</p> </div>
3.	Press the number that corresponds to the desired AVS Prompt.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">AVS On CardNPr</p> <p>1. None 2. Address 3. Zip 4. Address&Zip</p> </div>
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.2.4 Card Present

Note

I On manual transactions, different data is required depending upon whether or not the card is present. This feature sets the option to assume the card **is** or **is not** present or to **ask** if the card is present.

E **Example:** To be assured that the AVS prompts are always displayed, I will set the Card Present option to **No, if manual**.

OPTION	DEFINITION
No, If manual	It is assumed that the card is NOT present on all manual entry transactions.
Always Yes	It is assumed that the card is always present.
Ask, If manual	The terminal will ask if the card is present on all manual entry transactions.(default)

STEP	ACTION	DISPLAY
1.	From the Fraud Control menu press [4] to set the Card Present options.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Fraud Control</p> <p>1. AVS On Swipe 2. AVS On CardPrsnt 3. AVS OnCardNotPrsnt 4. Card Present</p> </div>
2.	Select the card type you wish to modify or press [1] for all card types.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Select Card Type</p> <p>1. ALL 2. Visa 3. MasterCard 4. AMEX</p> </div>
3.	Press the number that corresponds to the desired Card Present option.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Card Present</p> <p>1. No, if manual 2. Always Yes 3. Ask, if manual</p> </div>
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.2.5 V-Code

Note

I This feature enables the user to determine how to set up the CVV, CVC and CID security feature for individual card types or for all card types.

OPTION	DEFINITION
Off	Will not prompt for Code
On if Manual	Will prompt for Code on manual entry transactions(default)
On if Manual, Card not Present	Will prompt for Code if card is not present
On Always	Will always prompt for Code

STEP	ACTION	DISPLAY
1.	From the Fraud Control menu press [5] for V-Code.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Fraud Control</p> <p>2. AVS On CardPrsnt 3. AVS OnCardNotPrsnt 4. Card Present 5. V-Code</p> </div>
2.	Select the card type you wish to modify or press [1] for all card types.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Select Card Type</p> <p>1. ALL 2. Visa 3. MasterCard 4. AMEX</p> </div>
3.	Press the number that corresponds to the desired CVV Mode.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">V-Code</p> <p>1. OFF 2. On if manual 3. OnIfMan.CrdNotPrsnt 4. On always</p> </div>
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.3.3 Local Dup Check

Note

I This feature will notify the user when there are duplicated transactions of the same amount and same card account number.

STEP	ACTION	DISPLAY
1.	From the Main Menu, press [5] for System Settings	MAIN MENU: 2. Merchant Settings 3. Operation Settings 4. Hosts Settings 5. System Settings
2.	Press [3] for Working Mode.	SYSTEM OPTIONS: 1. Date/Time Setup 2. Batch Number 3. Working Mode 4. Pre-Dial Call
3.	Press [3] for Local Dup Check.	WORKING MODE: 1. Tip Options 2. Fraud Control 3. Local Dup Check
4.	If the security for Card Manual Entry is on, the terminal will prompt for the manager password. When prompted, enter the password and then press [ENTER] .	ENTER PASSWORD:
5.	The default setting is OFF. Press [1] to disable Clerk ID mode. <u>OR</u> Press [2] to enable Clerk ID Mode.	Dup Check : I 1. OFF 2. ON
6.	STOP.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.4 Pre-Dial Call

Note

This feature provides the user options of whether to enable the Pre-Dial Call function or not. If it is enabled, terminal will make a pre-dial call to the host.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [4] for Pre-Dial Call.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>SYSTEM OPTIONS:</p> <ul style="list-style-type: none"> 2. Batch Number 3. Working Mode 4. Pre-Dial Call 5. Database </div>
2.	Scroll through the EDC Type options then press [ENTER] to select. <u>OR</u> Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>SELECT PMT TYPE:</p> <ul style="list-style-type: none"> 1. ALL 2. CREDIT 3. DEBIT 4. EBT </div>
3.	Use the [▲] & [▼] keys to find your selection and then press [ENTER] . Or Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>PreDial Call</p> <ul style="list-style-type: none"> 1. Predial OFF 2. Predial ON 3. Predial on SWIPE </div>
4.	Stop.	

6.7.5 Database

This sub-menu has three options:

MENU	DESCRIPTION
<input type="checkbox"/>	Void
<input type="checkbox"/>	Post Auth
<input type="checkbox"/>	Clear Database
<input type="checkbox"/>	Clear Reversal

6.7.6.1 Void

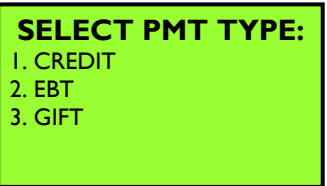

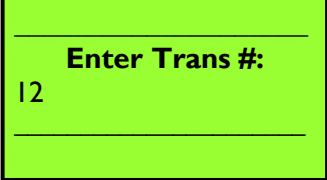

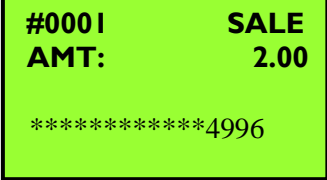

Note

I The Void sub-menu under Edit Database is an easy way to void transactions. All the void transactions will behave as manually entered void transactions.

E **Example:** I need to void transactions 1 through 14. This can be done quickly by using the Edit Database function. If it is not necessary to have a Void Receipt for all of the transactions, put the terminal in No Paper Mode. Remember to disable NPM after all of the transactions have been voided.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [5] for Edit Database.	SYSTEM OPTIONS: 3. Working Mode 4. Pre-Dial Call 5. Database 6. Pin Pad Settings
2.	Input the Password and Press [ENTER]	ENTER PASSWORD:
3.	Press [1] for void transactions	EDIT DATABASE: 1. Void 2. Post Auth 3. Clear Database 4. Clear Reversal
4.	When the void is not supported or is disabled. Else go next step.	NOT AVAILABLE

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

5.	Select an EDC Type	
6.	Input the transaction # to be voided.	
7.	View the transaction on the display to verify it is the correct transaction then Press [ENTER]	
8.	Press [ENTER] to complete <u>OR</u> Press [CANCEL] to cancel.	
9.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.6.2 Post Auth

Note

I The Post Auth Transaction sub-menu under Edit Database is an easy way for completion transactions.

E **Example:** I need to complete transactions 1 through 14. This can be done quickly by using the Edit Database function. If it is not necessary to have a Completion Receipt for all of the transactions, put the terminal in No Paper Mode. Remember to disable NPM after all of the transactions have been completed.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [5] for Edit Database.	SYSTEM OPTIONS: 3. Working Mode 4. Test Mode 5. Pre-Dial Call 6. Database
2.	Input the Password and Press [ENTER] .	ENTER PASSWORD:
3.	Press [2] for Post Auth transactions.	EDIT DATABASE: 1. Void 2. Post Auth 3. Clear Database 4. Clear Reversal
4.	When Post Auth is not support or is disabled. Else go next step.	NOT AVAILABLE
5.	Input the transaction # to be completed.	Enter Trans #: 12
6.	View the transaction on the display to verify it is the correct transaction then Press [ENTER]	#0001 AUTH AMT: 52.00 *****4996

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	Terminal goes to the normal steps for a Post Auth transaction.
8.	Stop.

6.7.6.3 Clear Database

Note

I It is possible to clear the database for each EDC type individually or all of them together. Before clearing the database, make sure there are receipts with the full account number for all of the transactions. If necessary, run a Journal Report.

For detail about reversal flag, it will also delete if you choose "ALL" in select PMT Type screen.

Before clearing the database, it is strongly recommended to make sure there are receipts with the full account number for all of the transactions. If necessary, run a Journal Report.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [5] for Edit Database.	SYSTEM OPTIONS: 3. Working Mode 4. Test Mode 5. Pre-Dial Call 6. Database
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Press [3] for Clear Database	EDIT DATABASE: 1. Void 2. Post Auth 3. Clear Database 4. Clear Reversal
4.	Press [ENTER] to continue <u>OR</u> Press [CANCEL] to cancel	ARE YOU SURE? ENTR=YES, CANC=NO

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

5.	Select EDC type you wish to clear the database for then press [ENTER] . <u>OR</u> Press [ENTER] to clear all databases.	SELECT PMT TYPE: 1. ALL 2. CREDIT 3. DEBIT 4. EBT
6.	A short report listing the cleared databases is printed.	
7.	Stop.	

6.7.6.4 Clear Reversal

Note

I If an authorization request is sent to host, but there is no response received, the terminal will try to reverse that transaction to avoid mistake. But sometimes it may happen that the reversal will never succeed. **This will make the terminal unable to process anymore transactions.** To avoid this situation, you can clear the reversal flag in this menu, so that the terminal will not try the reversal anymore.

Note that the original transaction may already be approved in host, so the total transactions may not match while Batch Close.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [5] for Edit Database.	SYSTEM OPTIONS: 3. Working Mode 4. Test Mode 5. Pre-Dial Call 6. Database
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Press [4] for Clear Reversal	EDIT DATABASE: 1. Void 2. Post Auth 3. Clear Database 4. Clear Reversal
4.	Press [ENTER] to continue <u>OR</u> Press [CANCEL] to cancel	ARE YOU SURE? ENTR=YES, CANC=NO

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

5.	Stop.

6.7.6 Pin Pad Settings

Note

 Use this function to modify the Pin pad Settings.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [6] to Select the Key Location.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>SYSTEM OPTIONS:</p> <ul style="list-style-type: none"> 4. Test Mode 5. Pre-Dial Call 6. Database 7. Pin Pad Settings </div>
2.	Input the Password and press [ENTER]	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ENTER PASSWORD:</p> </div>
3.	Press [1] to select the Internal PIN pad. <u>OR</u> Press [2] to select the External PIN pad.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>PIN Pad Type: I</p> <ul style="list-style-type: none"> 1. Internal PIN pad 2. External PIN pad </div>
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.7 Keys Injection

Note

 Use this function to enter the Key Load sub application.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [7] to Select the Keys Injection.	<p>SYSTEM OPTIONS:</p> <ul style="list-style-type: none"> 4. Pre-Dial Call 5. Database 6. Pin Pad Settings 7. Keys Injection
2.	Input the Password and press [ENTER]	<p>ENTER PASSWORD:</p>
3.	<p>Press [1] or [2] to enter the function:</p> <p>[1] Will start the Key Injection process, after you see the screen in step 4 then skip to step #7.</p> <p>[2] If you need to set baud rate, skip to step #5.</p>	<p>KEY INJECT</p> <ul style="list-style-type: none"> 1. Start 2. Set Baudrate
4.	Session Started	<p>KEY INJECT</p> <p>Receiving...</p>
5.	Use the [▲] & [▼] keys to find your selection and then press [ENTER] . Or Press the number corresponding with your selection.	<p>BaudRate 1200</p> <ul style="list-style-type: none"> 1. Set to 1200 2. Set to 2400 3. Set to 4800 4. Set to 9600
6.	After setting the baud rate return to step 3 in this process.	
7.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.8 Application Management

Note

 Use this function to enter the App Load sub application.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [8] to Select App Management.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>SYSTEM OPTIONS:</p> <ul style="list-style-type: none"> 5. Database 6. Pin Pad Settings 7. Keys Injection 8. App Management </div>
2.	Input the Password and press [ENTER]	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ENTER PASSWORD:</p> </div>
3.	Use the [▲] & [▼] keys to find your selection and then press [ENTER] . Or Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>APP LOAD</p> <ul style="list-style-type: none"> 1. Activate 2. App Update 3. Configuration 4. Terminal SN </div>
4.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.9.1 Activate

Note

I Use this function to activate the App Load.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [9] to Select App Management.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>SYSTEM OPTIONS:</p> <ul style="list-style-type: none"> 6. Database 7. Pin Pad Settings 8. Keys Injection 9. App Management </div>
2.	Input the Password and press [ENTER]	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ENTER PASSWORD:</p> </div>
3.	Press [1] to activate App Load.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>APP LOAD</p> <ul style="list-style-type: none"> 1. Activate 2. App Update 3. Configuration 4. Terminal SN </div>
4.	Press [1] for online activation. The POS terminal connects to the LCS server to communicate. Then POS terminal will display either Activated or error messages.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ACTIVATE</p> <ul style="list-style-type: none"> 1. Online </div>
5.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.9.2 App Update

Note

I Use this function to download applications, parameters, signatures, certifications from ADS and download advertisements from ADD.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [9] to Select the App Management.	SYSTEM OPTIONS: 6. Database 7. Pin Pad Settings 8. Keys Injection 9. App Management
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Press [2] for App Update.	APP LOAD 1. Activate 2. App Update 3. Configuration 4. Terminal SN
4.	If Terminal prompt “Please do batch close at first” so do batch close first then back to this menu. If there is no this prompt, skip to Step 5.	APP UPDATE Please do batch close first
5.	Terminal displays “ Checking... ” while checking if there are available applications on the ADS.	Checking...
6.	If there is no available download, the Terminal displays “ No Available DownLD ”.	No Available DownLD.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	If there are available, the Terminal automatic starts the download process; and displays " Downloading... " with the download progress percentage. After finish downloading, the terminal displays " Success " and lists the downloaded applications.
8.	Stop.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.9.3 Configuration

Note

I Use this function to configure the communication parameters of the App Load application, and Phone Setting is the function that allows user to set phone number to link to the BroadPOS Terminal Server.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [9] to Select the App Management.	SYSTEM OPTIONS: 6. Database 7. Pin Pad Settings 8. Keys Injection 9. App Management
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Press [3] for Configuration.	APP LOAD 1. Activate 2. App Update 3. Configuration 4. Terminal SN
4.	Press [1] to set Server URL and skip to Step 5. Press [2] to set Server Port and skip to Step 6. Press [3] for Phone Settings. Please refer to Host Phones .	CONFIGURATIONS 1. Server URL 2. Server Port 3. Phone Setting
5.	Set Server URL and press [ENTER] .	SERVER URL █
6.	Set Server Port and press [ENTER] .	SERVER PORT █

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

7.	Stop.
----	--------------

6.7.9.4 Terminal SN

Note

I This function displays the SN and other information of the terminal.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [9] to Select the App Management.	SYSTEM OPTIONS: 6. Database 7. Pin Pad Settings 8. Keys Injection 9. App Management
2.	Input the Password and press [ENTER]	ENTER PASSWORD:
3.	Press [4] for Terminal SN.	APP LOAD 1. Activate 2. App Update 3. Configuration 4. Terminal SN
4.	Screen displays the SN and other information of the terminal.	
5.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7.9.5 App Info

Note

I This function displays the App Info of each application.

STEP	ACTION	DISPLAY
1.	From the System Settings menu, press [9] to Select the App Management.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>SYSTEM OPTIONS:</p> <ul style="list-style-type: none"> 6. Database 7. Pin Pad Settings 8. Keys Injection 9. App Management </div>
2.	Input the Password and press [ENTER]	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>ENTER PASSWORD:</p> </div>
3.	Press [5] for App Info.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p>APP LOAD</p> <ul style="list-style-type: none"> 2. App Update 3. Configuration 4. Terminal SN 5. App Info </div>
4.	Screen displays the App Info of each application. Press [ENTER] to go forward.	
5.	Stop.	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

6.7 Communications

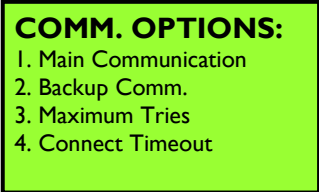

This Menu has following sub-menus pertaining to communication. These parameters affect communications during authorization and batching only. The following features are part of the Communication Menu:

MENU	DESCRIPTION
	<input type="checkbox"/> Main Communication
	<input type="checkbox"/> Backup Comm
	<input type="checkbox"/> Maximum Tries
	<input type="checkbox"/> Connect Timeout
	<input type="checkbox"/> Receive Timeout
	<input type="checkbox"/> Dial Parameters
	<input type="checkbox"/> LAN Parameters(for Terminal with LAN)
	<input type="checkbox"/> Wireless Parameters(for Terminal with Wireless Module)

1.8.1 Main Communication

Note

 Use this feature to set the main method of communication. If a method of communication not supported by the terminal is selected, the error message “**NOT AVAILABLE**” is displayed.

STEP	ACTION	DISPLAY
1.	From the Communication Options menu press [1] for Main Communication.	 <p>COMM. OPTIONS: 1. Main Communication 2. Backup Comm. 3. Maximum Tries 4. Connect Timeout</p>
2.	Use the [▲] & [▼] keys to select the primary communication type.	 <p>Main Comm.:I 1. LAN 2. Dial</p>
3.	Stop	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

1.8.2 Backup Communication

Note

I Use this feature to set the backup method of communication. If a method of communication not supported by the terminal is selected, the error message “**NOT AVAILABLE**” is displayed.

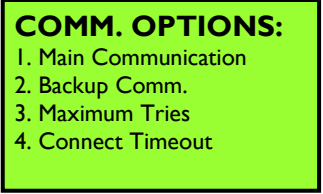

STEP	ACTION	DISPLAY
1.	From the Communication Options menu press [2] for Backup Communication.	COMM. OPTIONS: 1. Main Communication 2. Backup Comm. 3. Maximum Tries 4. Connect Timeout
2.	Default setting is [2] None . Use the [▲] & [▼] keys to select the primary communication type. Note: If in Main Communication menu Dial is selected, then in this menu the first option is LAN .	Backup Comm:3 1. Dial 2. None
3.	Stop	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

1.8.3 Maximum Tries

Note

 Use this feature to set the maximum number of tries for communication.

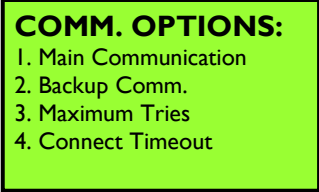

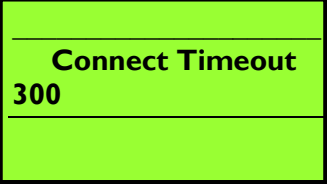

STEP	ACTION	DISPLAY
1.	From the Communication Options menu press [3] for Maximum Tries.	
2.	Terminal displays the current tries setting. Input the New tries # and press [ENTER]	
3.	Stop	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

1.8.4 Connect Timeout

Note

 Use this feature to set the timeout for connection.

STEP	ACTION	DISPLAY
4.	From the Communication Options menu press [4] for Connect Timeout.	
5.	Terminal displays the current timeout setting. Input the New timeout and press [ENTER]	
6.	Stop	

1.8.5 Receive Timeout

Note

 Use this feature to set the timeout for receiving messages from host.

STEP	ACTION	DISPLAY
7.	From the Communication Options menu press [5] for Receive Timeout.	
8.	Terminal displays the current timeout setting. Input the New timeout and press [ENTER]	
9.	Stop	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

1.8.6 Dial Parameters

Note

 All of the parameters that can be set for phone line communication are sub-menus under the Dial Parameters menu.

STEP	ACTION	DISPLAY
1.	From the Communication Options menu press [6] for Dial Parameters.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Comm. Options</p> <p>4. Connect Timeout 5. Receive Timeout 6. Dial Parameters 7. LAN Parameters</p> </div>
2.	Press [1] to enter the Dial Type menu. <u>OR</u> Press [2] for Dialing Prefix.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Dial Params:</p> <p>1. Dial Type 2. Dialing Prefix</p> </div>
3.	If in Step 2, [1] Dial Type is selected, the Dial Type menu will be displayed. Use the [▲] & [▼] keys to find your selection and then press [ENTER] . Or Press the number corresponding with your selection.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Dial Type: 1</p> <p>1. Tone 2. Pulse</p> </div>
4.	If in Step 2, [2] Dialing Prefix is selected, enter the Dialing Prefix.	<div style="border: 1px solid black; background-color: #90EE90; padding: 5px;"> <p style="text-align: center;">Dialing Prefix:</p> <hr/> </div>
5.	Stop	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

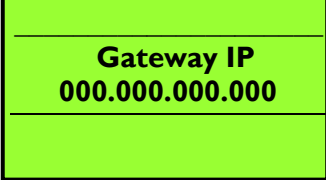

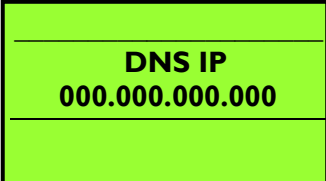

6.8.7 LAN Parameters

Note

I All of the parameters that can be set for LAN communication are sub-menus under the LAN Parameters menu.

STEP	ACTION	DISPLAY
6.	From the Communication Options menu press [7] for LAN Parameters.	<p>Comm. Options</p> <p>4. Connect Timeout 5. Receive Timeout 6. Dial Parameters 7. LAN Parameters</p>
7.	Press [1] to enter the LAN Type menu.	<p>LAN Params:</p> <p>1. LAN Type</p>
8.	Press [1] for DHCP and press [2] for Static	<p>LAN Type: 1</p> <p>1. DHCP 2. Static</p>
9.	If [2] Static is selected, new options will show.	<p>LAN Params:</p> <p>2. IP Address 3. Subnet Mask 4. Gateway IP 5. DNS IP</p>
10.	Press [2] for IP Address and then input it.	<p>IP Address</p> <p>000.000.000.000</p>
11.	Press [3] for Subnet Mask and then input it.	<p>Subnet Mask</p> <p>000.000.000.000</p>

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

12.	Press [4] for Gateway IP and then input it.	
13.	Press [5] for DNS IP and then input it.	
14.	Stop	

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

APPENDIX A - Receipts

A.1 Credit Card Receipts Template

Items in blue are conditionally optional. If not given, these items should not be printed.

APPENDIX B - Troubleshooting

Note

I This section briefly describes how to troubleshoot some possible common problems that may arise during the normal operation of the POS Terminal POS terminal. Check the list below for a possible cause of the problem you are experiencing before requesting service for this unit. A few simple checks that you can perform yourself may solve your specific problem and restore proper operation. If you are still unable to solve this problem, contact your technical support help desk.

B.1 General Troubleshooting

Where is the Serial Number located?

There is a white label on the underside of the terminal; the serial number is under the bar code on this label.
The serial number begins with S/N and is composed of, followed by 8 digits.

The terminal seems to have no power.

- Check the connections of the AC electrical power adapter. The electrical plug should be fully plugged into the electrical wall outlet, and the power adapter's barrel connector is properly inserted into the connector labeled **PWR** on the terminal's rear connections panel.
- If the terminal is equipped with a back-up battery or is a wireless terminal, press and hold the ON/OFF key for three seconds.
- Try plugging a different device into the electrical wall outlet.
- If possible, try a different power adapter.
- If using a wireless terminal, allow the battery to charge 10 to 12 hours with the terminal on and the AC adapter plugged into an electrical wall outlet.
- The screen contrast might be too high or too low causing the terminal to appear to be powered off.

General Troubleshooting, Continued

“App. Incompatible Data will be lost!”

A new application has been loaded. This application is not compatible with the previous application’s data (transaction) format.
If there are transactions still in the terminal they need to be batched, the previous application should be re-loaded so that the transactions can be batched. If this is the case, reboot the terminal and press **MENU** to return to the monitor download menu. Re-load the old application and parameters and close the batch. Load the new application again.
If there are no open batches, press **ENTER** to complete the new load.

“Application: Error In Parameters!”

An error occurred while reading the protocol parameters. Re-load the terminal’s parameters. This error can also occur if the Baud rate on the setting tab on PC LOADER is not set to 115200.

“EDC ERROR!”

Perform a file system Rebuild from Monitor Menu with the PC LOADER.
WARNING, a file system Rebuild erases all transaction data and restarts the application.

“PARAMETERS ERROR”

Phone card parameters are either missing or are corrupted. Re-load the terminal’s parameters.

“Prm Err: From:”

An error occurred while reading the protocol parameters. Re-load the terminal’s parameters.

“WRONG PRM BLOCK RELOAD PARAMS!”

Re-load the terminal’s parameters.

“FILE OPEN ERROR”

Perform a file system Rebuild from Monitor Menu with the PC LOADER.
WARNING, a file system Rebuild erases all transaction data and restarts the application.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

General Troubleshooting, Continued

“Storage is Full Need to Batch”

- Close the current batch.
- Press FUNC + MENU, select the Batch.

“User F/S wasn’t created or incorrect. Call Center to create User F/S”

Perform a file system Rebuild from Monitor Menu with the PC LOADER.
WARNING, a Database Reset erases all transaction data and restarts the application.

“TRANS TYPE DISABL FOR THIS CARD”

The card type (VISA for example) has been disabled.

“Not relevant in this application”

A menu selection not supported by the terminal type was accessed. I.e., Radio Parameters was selected in a landline only terminal.

“Invalid Date!”

A month greater than 12 or a date greater than the number of days in the month was entered in the date field.

“Invalid Time!”

- An hour greater than 24 was entered as the current time.
- A STOP Time was entered that is earlier than the START Time (AutoDial Setup for example).

Receipt Prints “CANCELLED”

The terminal displays a host response, or other error message, stating the reason the transaction was cancelled. Contact your technical support help desk for assistance.

Error message when printing Print Setup Report.

Press ENTER to continue printing the report.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

General Troubleshooting, Continued

The terminal time reverts to 1/1/1995 or 1/1/2000 after being removed from power source.

The internal battery needs to be replaced. This requires repair by a certified repair center.

The eight-digit user password has been forgotten.

Reload the parameters using BroadPOS.

Screen display is too light / dark.

The screen contrast is too high or too low. Adjust the Contrast by rebooting the terminal and press the **MENU** key. Then scroll down until you see the LCD Adjust Menu option.

“Invalid Terminal ID” or “Invalid Merchant ID”.

This is usually displayed when trying to authorize a transaction directly after a download. Verify all of the Parameters for the Host Processor. One or more of the parameters are most likely incorrect.

“Bad Credit Batch”

“Bad Credit Batch” or “Bad Debit Batch” is a system message that is displayed and printed when an EDC batch will not close. This is usually due to the Host and terminal being out of balance. This means that the terminal has a balance that is different from the balance that the Host has. This message should be followed by a Host Specific message. Contact the Host Processor for more information.

New Batch Opened.

Close the current Batch.

Need to Batch! More Offlines.

The maximum number of stored (offline) transactions has been reached. Upload and batch the current transactions.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

General Troubleshooting, Continued

Wrong Auth No, Try Again. (Auth No must be 6 digits only.)

Verify then enter the correct authorization number.

Re-enter ZIP Code

ZIP code format was not correct, must be 5 or 9 digits long.

Incorrect ZIP, Try Again. (ZIP code must be 5 or 9 digits only.)

The incorrect number of digits was entered three times when the Zip code was requested. Try the transaction again; enter either 5 or 9 digits when the ZIP code is requested.

The terminal appears to be locked up; pressing the MENU key does nothing.

Terminal needs to be reset.

- Remove power source from terminal. (Unplug from current. If terminal has battery option, power terminal off.)
- The terminal will be reset.

The display is a line of black boxes.

The terminal needs to be repaired.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

B.2 Communication Errors

“NO LINE” appears on the display of a Land Line Terminal.

- Check that the telephone (RJ-11) connector is securely inserted into the connector labeled LINE on the terminal’s rear connections panel and into the telephone wall outlet.
- The POS Terminal was designed to use a dedicated analog telephone line. It should not be connected to a splitter or to a rollover telephone system.
- An exchange prefix may be required. Make sure terminal has correct settings for an exchange prefix.
- Disconnect the terminal from the phone line and connect the phone line to a telephone. Verify that the phone has a dial tone.
- If a phone or fax machine is daisy-chained to the terminal, disconnect the second device.
- If a digital line, turn off the CHECK LINE and DIAL TONE CHECK functions in the Communications menu.

“NO LINE” appears on the display of a Wireless Terminal.

- If using a wireless terminal, make sure that you are receiving radio coverage in the area where you are located.
- Turn Battery Saver off (see Menu Option).
- Try processing a transaction on a landline.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

B.3 Printer Troubleshooting

The printer does not function properly.

- Check that the correct type of thermal paper is loaded in the print paper compartment and that it has been properly fed to the printer (underhand). Replace if required.
- If the terminal is on battery power only, fully charge the battery or put the terminal on the power adapter.
- Verify that the paper is not jammed or damaged.
 1. Try ejecting the jammed paper with the FEED function (if applicable).
 2. Slowly and carefully pull the paper backward through the feed mechanism.
- If printer continues working even though the paper has been used up, check that the 'end of paper' detector in the printer mechanism is not blocked by debris or a torn piece of paper.
- If the printer is printing but the characters are incorrect or off-center, reload the font library using PC LOADER.
- If the paper does not feed into the printer mechanism:
 1. Make sure the leading edge is even and undamaged
 2. Cut the paper at a slight angle with the left edge feeding first.

B.3 Pin Pad Troubleshooting

PIN Pad Inactive.

On Secure terminals the message "PIN PAD INACTIVE" is displayed. The PIN Pad must be activated. Access PIN Pad Function in the System Option menu.

Error! Check PIN Pad.

- Verify that the terminal is equipped with an internal PIN Pad.
- Check the connection to the external PIN Pad.

Error! Check MAC Keys.

- External PIN Pad is not encrypted correctly.
- External PIN Pad is not encrypted.

Internal PIN Pad not Detected.

Terminal is not equipped with an internal PIN Pad. An external PIN Pad must be used.

Invalid Entry! Key Not Accepted.

An incorrect key was entered in the Master / Working Key field. Re-enter the key.

ERROR: No Key.

- Internal PIN Pad is not encrypted correctly.
- Internal PIN Pad is not encrypted.

Internal Error #23.

Temporary Error, wait a while and try the transaction again.

Internal Error #24.

Try transaction again.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

Pin pad Troubleshooting, Continued

Internal Error #. . .
<ul style="list-style-type: none">• Re-load keys.• Call Customer Support.

Packet Error #1, 5, 6 or 7
Try transaction again.

Packet Error #2, 3 or 4
<ul style="list-style-type: none">• Try transaction again.• Verify the check account number.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

B.4 Download Troubleshooting

“Out of Rx-TX” error at the start of an AutoLoad or Parameter Load.

The “Out of Rx-Tx” message displayed on the terminal is followed by an “Open Com Error” message. The TMS error is “Terminal ##### not found”.

The incorrect Site ID was entered during the download setup process. The ID entered does not exist in the TMS database. Correct the Site ID and start the DL process again.

Warning

Care must be taken when entering the Site ID. If the ID entered belongs to an existing file but that file was created for a different Merchant, the file might still load into the terminal. Always verify the information loaded after a DL completes.

“NO LINE” or no connection when attempting a download.

- Check that the telephone (RJ-11) connector is securely inserted into the connector labeled LINE on the terminal’s rear connections panel and into the telephone wall outlet.
- The POS Terminal was designed to use a dedicated telephone line. It should not be connected to a splitter or to a rollover telephone system.
- Verify the DL Phone Number.
- Verify that the VIA function is set to Modem.
- Verify the baud rate. If rate is correct, try a lower rate.
- An exchange prefix may be required. Make sure terminal has correct settings for an exchange prefix.
- Verify that the DIAL function is set correctly for the phone system.
- Try another phone connection.
- Connect a phone on the line currently connected to the terminal. Do you hear a dial tone? If not, there is a problem with either the cable or the phone jack.

NOTE: This document is CONFIDENTIAL and must be used exclusively for the operation of PAX programs. It may not be duplicated, published, or disclosed without prior written permission from PAX.

APPENDIX D- Glossary

A

AVS: Address Verification System. Address Verification System (AVS) is a system used to verify the identity of the person claiming to own the credit card.

B

Batch: The collection of current transactions stored in the terminal's database.

C

CID: Card Identification Number

CVC: Card Verification Code

CVV: Card Verification Value

E

EBT: Electronic Benefit Transfer

H

HALO: High Amount Lock Out - maximum amount limit on sales, returns, and cash back

P

PIN: Personal Identification Number – 4 to 16-digit confidential code used by cardholders to identify themselves as the proper users of a credit or debit card to the Host computer.

PIN Pad: A small terminal used for entering Personal Identification Numbers (PINs). PIN Pads can encrypt PINs before sending them to a terminal or other controller. Some PIN Pads are equipped with built-in magnetic stripe card readers or are built into the terminal.

Pre-Dial Call: allows user to enable/disable pre-dial for faster processing time

POS: Point of Service

POS Terminal: Point of Sale Terminal - a terminal used at the purchase location, which is usually at a merchant's locale where the customer pays for goods or services received. Information concerning the sale can be entered into the terminal and transmitted to a remote Host computer for verification and processing.

S

S80: terminal from PAX

SMA: Speed Messaging Application

V

V-Code: A unique 3-4 digit value printed on the back (front for American Express) of a card to validate card information during the authorization process. CID – American Express and Discover Card. CVC – MasterCard; CVV – Visa
